Do not deal with this user.

User is a scammer or is partnered strongly with another similar scammer.

Check this thread for proof:

Spoiler ([Click to View](#))

The only legitimate resellers of DiamondFox are the coder and the people he has given public license to sell on his thread @ exploit.in (private Russian hacking forum).

I can assure you, this guy is not listed in the official sales thread nor does he have the botnet. All vouches here are either bought or stolen accounts, or people he paid to vouch.

He does not have the product and will 100% scam your ass if you send him a single dime.

This guy has been here like 5 times already, trying to sell botnets, exploit builders, etc. etc.

He is an Algerian kid, I scammed him back for 235\$ after he robbed other members of hundreds of dollars last time.

I got his IP and his e-mail. If anyone wants to fuck him up, I can send you those.

Cheers.

This is why i don't deal with people with low or no reputations. Can someone send me the seller's direct contact or website?
