It looks awesome but I would make the Gfuel bigger because it isn't very clear on the picture.

That's really cool. Looks realistic as well.

(Jul 8, 2017 07:27 PM)Yani Wrote: [\[CITE\]](#) Because of the tron styled straight floor lines I would use straight lines for the text as well. And the text feels awfully off center for some reason. I'm sure it isn't tho lol. It just doesn't feel good floating there.

Looks really cool btw, did you make it in 3D?Thank you, I also agree with your suggestion, the straight lines are better. Also I did make this in C4D :)

I'd add less shadowing towards the end of the GFUEL on the tub. I don't mess w/ C4D a lot, but it looks like it needs more lighting around it to make it stand out.

I think it looks great, the one with the distorted text seems out of place so the normal one is better imo. Other than that i like it!
