Thread: [RDP ForcerX 1.5 - RDP Bruteforce.](#)

SIM-595622 - July 1, 2017, 3:00 am

Have anyone used this?

The Detector doesnt find any "good" rdps at all from only 3389-3392 scans. Even on the range my own rdp is at. Did I miss something for this feature to work?

Enlighten me anyone.

Scan better IP# ranges...

Look for company/corporate sub nets.

Thanks for the reply buddy.

Have you used it? The detector finds all usernames on the rdp then you just have to use a password list. So, it should have found the usernames on my rdp ip which I scanned? Or is this "detector" thingy exploit-based and is patched on updated OS's?

wowthis seems like a greaat doftwrae

fallag - May 19, 2018, 10:42 am

its very good tool to scan ip
just use nlbrute to crack :)

dullex - November 23, 2018, 3:54 pm

Hi guys. Do you know the author of this software? I want to buy it.

vootkid422 - August 4, 2020, 10:16 pm

you are grate thank you broo...

Grave digging are we? Hopefully this will stop that. Here's a RDP scanner and brute forcer.
