Hi,

I've created a UrlShortner Service,

People can get 1000 pageviews of atleast 5 seconds per view for only \$1,-.

We accept Bitcoin Only!

Link: <http://urlsh.pw/>

Please let me know what you think!

Thanks in advance!

You just upload script from codecanyon and buy the cheapest domain on namecheap. Nothing special

I like the layout of your website and i like the fact that your advertising rates are cheaper than other popular URL shorteners.

On your Advertising Rates page you need to add a space between the words Related and Hacking on the sixth bullet point.

Also you may want to hide your statistics on your home page for a while as they are pretty low and it may turn people away from using your service. Once your statistics have increased you should show them again.
