Mr. Reviewer - July 1, 2017, 8:21 am

BEFORE YOU READ THE REVIEW

Spoiler [\(Click to View\)](#)

-You must understand that the reviews I make are from my point of view.If I grade 3/10 that doesn't mean the method itself is bad, maybe for other people that method is 7, so keep this in mind when you're reading my reviews.

-My reviews will probably piss off many people and break some of their businesses ...or raise them.This means I will not debate with the sellers whether or not my reviews are accurate.Unless there is really something wrong I won't recheck my analysis.

-I review good and bad products, not only bad products as some of you may suspect.In the end, remains the decision of the reader if it's bad or good.

FAQ

Who am I?Spoiler [\(Click to View\)](#)

-A random guy that bought dozens of methods in the past few months from HackForums Sellers, and with disappointment, I announce that 90% don't work or they require insane hard work to even get them started. Highly "vouched" methods, with "valid proofs" from so highly upper-class "highly vouched members/old members" or how you want to call them, methods that look good on paper but on practice leave you with a sour taste in your mouth and with dust in your wallet.

-For those that keep asking me, "who I am and how I buy for months but my account is only for a week". I've been on hackforums for awhile now, my first account was around 2009 but was disabled due to inactivity. I kept coming back.Never engaged in topics too much.Until 1'st May when I decided I should make reviews about products.

What I'm going to show you?Spoiler [\(Click to View\)](#)

Few angles to look at when you're buying a method and few insights of what each method consists of.

I will keep this short and say this - you don't have to become an investigator but in the end is YOUR money and YOUR time you're going to throw at a random guy that promises you the moon.

Great Product!" are not taken into consideration. Vouches without legit-proofs are not taken into consideration. Text-proofs are not taken into consideration. Personal review:

About the product:

Spoiler ([Click to View](#))

4/10

-Most methods are well known, very saturated, expect to enter in niches with high activity and competition.

-The book can be good if you're new to the internet and selling on the internet, provides examples of what and where to sell, this at the lowest level. The rest will depend on your creativity, inspiration dedication, and work.

-In most cases, a PayPal will be required.

About the seller:

Spoiler ([Click to View](#))

0/10

-There are points where the seller doesn't provide an in-depth explanation, even though more info could have come in handy, which will leave you unprepared/unfinished if you're new to the subjects.

-The ebook seems to be written fast like it was on a timer. Many pages unstructured with many words, but also a huge font.

-Inside his thread he is asked few questions about the methods by few different people and hit right on point, the seller doesn't evade the questions as he should he deliberately says "no, has nothing to do with that" which deceives the buyers.

-I have reasons to believe this guy is a multi. Methods are very similar to other products currently sold on the marketplace. Even the writing, font style is the same. More on this subject in the next few days.

-The vouchers are very low quality. This is related to the previous point I've made. More details about this subject in the next days.

Does not provide proofs of earnings from his own methods. Inside the ebook, however, he does

provide, a 200k proof!

This grade reviews his way of advertising, addressing to potential customers, his behavior and his way of convincing them and the connection between him and his ebook.

Freakyy - July 1, 2017, 8:22 am

He isn't a multi lol.....He has proxy sellers all over the forum

Also why don't you just leave reviews on the sale threads instead of making a 34934949349345 threads which a lot of people WONT see....

Cylow - July 1, 2017, 8:25 am

Surprised he was bold enough to go for a real review, which didn't end well ?

It brings attention to people who weren't going to buy anyways. New members don't go and look for reviews that are in the Marketplace Discussion. And most of his customers are new members who just join or are barely active.

Not sure how'd this review would keep someone from getting scammed lol.

The methods work but are known. Doesn't mean they don't work.

Rock™ - July 1, 2017, 1:49 pm

Proves how little most eBook makers actually care about their products.

Knucklez. - July 1, 2017, 1:50 pm

Crazy how much \$\$\$ he has probably made from that book !

Mycroft Holmes - July 1, 2017, 1:54 pm

Well, the eBook most likely works based on the methods Mr. Reviewer mentioned.

The point is that you cannot really analyze an entire market and start selling thousands dollars worth of products and services without having some proper knowledge about Internet Marketing in general and some good cash to invest.

Rest assured, even though the method works, it takes time to learn how to make money properly.

Imao i actually bought few ebooks that work ;) NOT GIVING A LOT but they work...but guess what they all rely on huge investments.... that's a very very bad part that every eBook seller seems to avoid mentioning

Armada - July 2, 2017, 8:20 am

H3gods crap is just that, crap.

I stay the hell out of his cancerous threads, because as the review noted, its a sloppy, lazy, poor mans attempt to generate income without any true fucking effort.

I would argue he single handedly brought the ebook marketplace down 10 notches alone, himself. Nice to see someone call him out for the garbage he peddles around here.

M?xim - July 2, 2017, 8:34 am

I never understood the point of having like 10 methods in one e-book.

I mean like, focus on one method throughout the entire e-book and make it solid as fuck. That will satisfy customers.

But 10? That's like, yeah.

Nice review.

I agree I tried it in like 2014 before it was popular and only hurt sales
