BEFORE YOU READ THE REVIEW

Under no circumstances will I ever modify or delete a review upon request, unless it's for a grammatical or spelling reason or I've just simply missed something out. This includes updates. I will only review your product in the state i was given to me in. If you choose to update your product after the review, it does not mean I will update the review. My review will not be removed upon request nor should it be taken as a vouch. My review should not be taken as an affiliation or promotion.

Among a few other members I will take my time to write a honest and detailed review about any eBooks, services, or products whether it is free or paid, and whether it is good or bad. Throughout the review my opinion will remain neutral and will not aim to sales trash any thread(s). I aim to increase sales of those who claim to have valuable and honest products and decrease sales of those who do not provide honest products, all in an effort to clean up the Marketplace and allow the community to get a generic idea of whether your product is worth buying or not.

There are no vouches.

Generic vouches such as "Vouch for X, he always has great products" and "Vouch for this guy, he knows what he's doing" aren't taken into consideration. Vouches with a relevant image and/or a video are taken into consideration when rating the vouches.

Profits:

There is no proof of profits provided.

Methods:

Method 1#:

How much investment does it require?

The amount of investment is optional.

Description:

This method does not only focus on how to potentially make money, but it also focuses on how to setup, how to use the site, and the recommended features you may wish to use on the site. Other than that, this method basically teaches you how to buy low and sell high.

Time:

The setup can be quite quick, however, this depends on how fast you go through the wizard. The information provided walks you through it. If you're looking to receive a noticeable amount of money back, then I do suggest starting with no less than a hundred or so. As for withdrawals, they can take up to five days due to you having to submit legal documents for the first time only.

Personal review: About the product:

7/10

My first impressions of this eBook was positive, and they still remain positive. The eBook remains structured with a contents page at the start of it, meaning you can fast forward to any part you want.

On the downside, I found that there were quite a few blank pages in the eBook. Alternatively, The actual content of the eBook is highly detailed and takes you from start to finish, and more or less everywhere in between.

The seller hasn't tried anything out of the ordinary and has stuck to a very basic and readable font, along with structured paragraphs and aligned text. That itself is a big plus for me. You're able to easily focus on the content.

Although risky, this type of method can not be patched due to the nature of the site you're investing at. Although it can be perceived as a little complicated, the images provided allow even starters to use this eBook as well as those who are experienced in this field already. This eBook only contains how to use the website provided, tips and tricks, information about deposits and withdrawals, and how to analyze the market. I do believe that the informational content should be the main selling point of this eBook, but for its price, there's little where you can go wrong.

Please do heed the fact that you need to be 18 due to legal documents required.

About the seller:

6.5/10

At the start, I wondered if the seller had used his method himself. Not due to the accuracy of the content, but due to the little proof provided within the thread except from a snippet of a reply I found which states "I went in and played a bit too, I went +\$120 up immediately on a investment". Within the sales thread and the actual eBook itself, there are also no alternative ways to contact the seller. Other than that, the seller seems to answer the only question in the thread in full and seemed rather honest when comparing what he said to the contents of the eBook. There was little communication between the seller and I (as it simply wasn't needed), which I will only assume is a good thing, so my rating of the seller remains positive.

I'm able to reject any eBook before a seller sends it to me. When it comes to you, I rejected to review your eBook due to such the hefty investment required, and literally 5 minutes later you still sent me the eBook. I cannot be at fault for that.

Thank you for the kind comments guys.

They obviously don't get a vouch copy simply because they do not vouch for the product as mentioned in OP.

Wires, good job on the review amte.

We now either purchase them or someone can request us to review their eBook. We do not request vouch copies from sellers.

Should of used a different term like review copy. I know they don't vouch for the ebooks.

Yeah requesting review is basically what I meant.

I asked them to review this and provided a copy freely for review.

I appreciate honest feedback, so on that note, Thank you Wires for a frank and honest review.

As for my note of "+\$120 up" I was not joking, after asking for the review I logged in to my account and started messing around again.

But as I clearly note as well, its a freaking gamble.

After all the shade that's been thrown against Mr. Reviewer and the team, I care little about the layout lol. Content's important, layout not so much.

Edit: And that's also an optional layout handed down to the reviewers in the sf.

Honestly, who cares?

Its a decent format, might as well use it and keep everything uniform.
