Dream Protector Free

Original Thread : [Thread](#)

Simple protector to show how to run a payload without dropping it using RunPE Technique

FeaturesInstallation

RunPE (itself, vbc.exe, cvtres.exe)

Delay

Custom Assembly

Custom Icon

Kristtik - July 3, 2017, 10:32 am

Startup is does not work !

GoodHacket - July 3, 2017, 11:03 am

can you send me source files? because i want to update your soft and stub too

Paskowsky - July 3, 2017, 11:09 am

It's the source, if it doesn't work, just fix it

Regards,
Paskowsky

INCEPTION_V - July 3, 2017, 11:18 am

(Jul 3, 2017 11:03 AM)GoodHacket Wrote: [\[CITE\]](#) can you send me source files? because i want to update your soft and stub too

There is a GitHub link. Use it.

GoodHacket - July 3, 2017, 12:03 pm

stub file can you say me name? because need only stub file.

C++? <

Fibo - July 3, 2017, 1:31 pm

(Jul 3, 2017 12:03 PM)GoodHacket Wrote: [\[CITE\]](#) stub file can you say me name? because need only stub file.

C++? <

can you read? its literally in the c# section.

Paskowsky - July 3, 2017, 1:53 pm

(Jul 3, 2017 01:31 PM)Fibo Wrote: [\[CITE\]](#) can you read? its literally in the c# section.

Thank you, i hate when people can't read.

?

GoodHacket - July 3, 2017, 2:25 pm

Sorry guys, im from Ukraine, and have som problems with it) thank you)

Ninja - July 3, 2017, 3:50 pm

I find the program oddly appealing, both because of simplicity and subtle things like the icons. And you used Github.

I like this.

Younis Khan - July 3, 2017, 5:09 pm

If I could rep you I definitely would, shoutout for this man! I wanna learn C# so I feel like the best way would be playing around with programs like this rather than following tutorials because I feel like I don't learn anything from tutorials.

MindFreak™ - July 3, 2017, 7:23 pm

Good job man, Thanks for releasing the source

GoodHacket - July 3, 2017, 8:16 pm

can you update a Stub file? or maybe make tutorial..

hessukek1337 - July 4, 2017, 2:42 am

thank you for educational purpose

Paskowsky - July 4, 2017, 4:18 am

You are welcome, i enjoy when people like my work ?

If you have any suggestions or improvements let me know ?

Regards

Paskowsky

Tronsmart - July 4, 2017, 4:28 am

good job on this release mate

az1388 - July 4, 2017, 7:13 am

nice release

i will try refud this to learn about crypting

edit : any tips on where to start for refuding this ?

i think string changes might help this but any help you can let me know?

just trying to learn it

Bud_Banshee - July 5, 2017, 4:01 am

Thanks am always looking for sources on crypters to study. Currently learning to write my own RunPE and seems yours is so simple (does not try to hide from AV) its a lot easier to read. Plus rep up for using github and commenting your code!

Annie13 - July 5, 2017, 4:03 am

Thank you man appreciated :)

Paskowsky - July 5, 2017, 4:07 am

RunPE is stored encrypted inside a dll, so it's not readable from antivirus and there is no need to obfuscate it.

Regards,
Paskowsky

I thought the same thing. Icons do a lot

Regards,
Paskowsky

It's perfectly readable in memory, which is what a lot of antiviruses check

tweety - July 5, 2017, 11:14 am

Public code lol. The D class.... Jesus ???

Zilog80 - July 5, 2017, 12:26 pm

(Jul 5, 2017 11:14 AM)Tweety. Wrote: [\[CITE\]](#) Public code lol. The D class.... Jesus ???

Library/D.cs:

PHP Code

```
<?php
if(CMemoryExecute.Run(data, injectionTarget))
{

}
else
```

```
{  
    Thread.Sleep(5000);  
}
```

Lol ?

INCEPTION_V - July 5, 2017, 12:31 pm

Expect 20 "new UNIQUE Crypterzzz" on the "Market" :)

0xDEAD10CC - July 5, 2017, 11:22 pm

This is pretty much spaghetti code to me. Your use of access modifiers and idea of encapsulation or any kind of consistency in naming among other things is completely lost, and your functions aren't really much more than separation of parts of code but very little abstraction going on here...

I wouldn't say I was expecting more from HF as I typically don't normally. Sorry it's not truly interesting to me anyways.

Paskowsky - July 6, 2017, 1:06 am

(Jul 5, 2017 11:14 AM)Tweety. Wrote: [\[CITE\]](#) Public code lol. The D class.... Jesus ???

I know it's public code, It's an example crypter, not a production paid crypter ?

k1r1LL - August 27, 2017, 7:36 am

Please check your mail , i can't pm you cause i not have 25 msg

I want buy your crypter

Zenco - August 30, 2017, 6:20 am

Nice release man, im sure it will help some people out that need it.

MarshallDiablox - July 13, 2018, 4:20 am

Hello,

I would like to buy your Crypter, but before i want run your free project :)

I left you a message on your free project you let on github about an issue; indeed it does not work well for me (it lacks dlls, alpha.dll and more i think).

Nevertheless, this source is very interesting for me.

Answer me when you can :)

I know but if he ever goes back there I'll be glad he accepts ^^

I do not find many other projects like this, and I would really like to learn how to develop my own Runpe.

techcrunch - *July 26, 2018, 7:37 pm*

wow nice program i think its fud
