Thread: [Crypto predictions August 1st 2017](#)

Mr. Robot - July 3, 2017, 12:17 pm

Previous 2 months.

<https://coininventory.net/user/July1st>

Making the coininventory now.

<https://coininventory.net/user/August1st>

If you don't know how this works, I put a theoretical \$100 on each coin - at the price of this thread as if you have bought in, and see where it's at in 1 months time.

Steve - July 3, 2017, 12:19 pm

Glad to see another prediction thread over hear. Much more conservative but still optimistic. Sticking with \$.70 in Maid I see.

Tomb Raider - July 3, 2017, 12:20 pm

Nice I loved the previous thread. Interesting jump for Stratis

Steve - July 3, 2017, 12:20 pm

Did you take into account the BTC fork?

SIM-403479 - July 3, 2017, 12:20 pm

I think ETH may be higher than what you predicted.

Always seem to value Maid very highly.

Stratis, we'll see. I hope so..

Trappy - July 3, 2017, 12:20 pm

Big doubts on that Bitcoin prediction, fork will cause a lot of blood, all else seems on point.

I would really like for ETH to be higher than what he predicted despite only having a few myself.

Eagerkid - July 3, 2017, 12:24 pm

If ETH goes to \$380 again and stays I will be one happy camper. Anywho nice predictions

Let's see what happens. Going to be an interesting few months that is for sure.

KissMyAxe - July 3, 2017, 4:15 pm

Why there is no antshares aka neo in this list?

God - July 3, 2017, 4:20 pm

very optimistic in my opinion.

for example, i don't see stratis going up by that much,

(Jul 3, 2017 04:15 PM)KissMyAxe Wrote: [\[CITE\]](#) Why there is no antshares aka neo in this list?

Because i'm basing this off the same coins I started with.

It's called consistency even though I want to remove ripple.

Maybe he hasn't looked into the coin it self or isn't bothered with it. I mean you can't just randomly put coins in that list and predict the price with no research.?

SIM-2562043 - July 4, 2017, 5:14 am

As said on your previous threads, I hope this is true

StuffSneak - July 4, 2017, 11:35 pm

BTC 3150? Wow thats some prediction. Are you actually investing or just speculating with those portfolios?

d4rkj4y - July 5, 2017, 3:01 am

Looks like the BTC markets are breaking out of the ascending triangle with some volume

If we can build momentum for another wave up then \$3800-\$4000 is my target sell zone

Alternatively if we break new highs but don't make it that high, I'll use the new immediate trend line breakdown to take profit

Altcoins are highly correlated and also turning green, I will sell most of my bags if BTC hits this target

Aside from long term investments, my plan is to be mostly in fiat a week or two leading up to Aug.1 UASF

Babypips - July 5, 2017, 6:03 pm

What would be the catalyst to get BTC that high lol? Also you recommend investing in GBTC?

I like your predictions. It looks like you're right most of the time.

Do you have any prediction on how SIA will go? I'm just curious from your point of view. I have my own predictions on it.

blazz28 - July 6, 2017, 11:52 am

guys what about zcash and siacoin for short term..i am waiting for them for a few days..nthg is happening...specially zec is low?

i would like to see also prediction from mr robot ..if there are some significant differences from kill joy..robot made predictions earlier but now situation is differenet

Like your predictions, more realistic.

Aug 1 we will see + or - dozens of percentage points across all major coins, I believe.
