Only other bot is Diabloic, diabloic randomly plays sounds and it takes 10 plus mins for it to show up on analytics, only does about 1/10 of what it said it does.

Im uploading a video for each module tommorow.

With YouTube views does the phantom browser like actually "see" the video so it will count as a real view and monetized view if using a real IP?

Purchased it now, let's see how it works.

EDIT:

Seems that the Adf.ly module won't work at all. I made more than 150 hits but Adf.ly doesn't even count one visit.

Waiting a response from the op.

Now managed to register but can't use, it tries to grab proxies and then gives an unhandled exception has occurred error.

The remote server returned an error: (404) Not found.
