**Bulma** - July 4, 2017, 1:51 am

GUNBOT

Hello Ladies and Gentelmens,

Today I want to offer you already well known product called 'GunBot'.  
This is not mine product, but I have privileges to sell it and make commissions.

I will tell just briefly what this bot does, because more info about this bot you can found in original thread [HERE](#) !

The BOT help's you to make ~2% Daily ROI, buy trading crypto currency pair's.  
It works as it should: buy low and sell high, it does it repeatedly generating a profit. This is not a PING-PONG algorithm, this is something more advanced that takes consideration of the market prices and volatility.

[Click Here For DETAILS About This BOT](#)

The BOT cost 0.1BTC, but from me you can buy for 0.075BTC as I have agreement with BOT developer and owner that I am able to sell cheaper and make some commissions !

The PRICE won't last such forever and in near future I will increase to 0.09 and above, so grab this bot while the price is really low and while BTC price not climbed to \$4k and above :)

So you saving 0.025BTC ! And getting EVERYTHING what includes in original price.

The PRICE in official GunBot thread: 0.1 BTC  
The PRICE buying from ME : 0.075BTC

After 10 sold copies for 0.075btc, I will increase the price to 0.09btc !  
Hurry to grab yours copy before the price increased !

I know that there are many who are resellers and dont see nothing bad, but they trying to destroy any person who selling cheaper including me. I know how much gunthar charge for each license from resellers, its 0.05btc, so i can sell even for 0.06 ! And of course you(resellers) can sell for such price, but you just not breaking resellers rules, but I am breaking and i dont care, because people should get this cheaper, as btc price is really huge, so I am giving opportunity for other guys to get this bot cheaper !

So it's your decision to pay 0.1 or 0.09 or 0.075 ...  
Who is interested and are sceptic always can write to gunthar in bitcointalk and ask if i am allowed to resell..  
end of talk.

GUNBOT

I got a clear confirmation that this is a real reseller, stop saying it's "sketchy" when its already approved ?

Looks like the coder has a big margin to work with, why should he not sell it for 0.07 is the question.

There are people who giving even 100% money to affiliates because they getting contact info and buyer in their list.

This is legit marketing, if you don't understand this, don't post shit here...

Gunthar did in fact authorize him as a GUNBOT re-seller although he said that he is not authorized to sell GUNBOT for under 0.09.

Although previous to his authorization he made the thread without Gunthar's permission, until after Gunthar granted him.

**Bulma** - July 5, 2017, 10:54 pm

I am officially allowed to resell GUNBOT and I can resell for 0.07 !

I talked with Gunthar about the bot, about reselling it, about the price and so on. I asked him if I can sell for 0.07 and this is what I got from him ;)

<http://prntscr.com/ftg8am>

Now I really think you trying to troll and screenshot is totally faked, as one guy already bought and the bot was enabled :)

I always was writing to Gunthar asking questions about reselling...

So damm it, if you want guys, I can make the price 0.09, but you really dont want to save some coins by buying for 0.07 ? I dont get it :D

really guys, so i need to put the price 0.09 in order to make you believe me that I am legit reseller ? :D

if yes, i can charge such price, the profit margin would be even bigger for me :D

I just asked him if I can sell the bot for any price I want and he said that I can sell for any price as long as he getting his share, whats it ;)

If you not entirely convinced, its ok, you can buy from him directly for 0.1btc, not going or trying to scam someone for 0.07btc :D

it's up to you.. and yeah,if you want ,you can buy from me for 0.09, you saving 0.01 still

I am making some profit margin from reselling. If I charge 0.09, profit margin would be bigger, if 0.07 btc, I still will make some profits, because Gunthar charging for the bot less.

I thought 0.07 is good price for people and I also making some coins. As long as I send gunthar his share, he will always enable the license.

Gunthar has resellers, Gunthar doesn't give a shit for how much it is sold as long as Mr Gunthar gets his cut.

If I ever win the lottery I'm buying this, right now the 1-5% profit won't do for me with my tiny bank roll.

About 1800 copies of this bot is already sold so you understand that really big community existing in closed group and the best part is that everyone is friendly and giving advices about settings to use for making money ;)

If you buy you would be added to the group, forum and you would have opportunity to chat to any person who using the bot and I am 100% sure you will get help, support. ;)

Havent scammed anyone !

I am authorized reseller and the price now is 0.08 !

I talked with Gunthar right now and I always can send him his share and he will enable license. Other resellers selling for at least 0.9 because they all agreed to such price, but I can do whatever I want as long as I sending gunthar his share.

So fuck off other resellers, I can sell for whatever I want !

People who reselling mad on me because i am selling for cheaper and they try to do everything to destroy me (faking screenshots).

Do you think 0.01 makes any different for gunthar ?  
It makes different just for other resellers, not for gunthar because every reseller paying the same amount to gunthar to get license enabled.

I also asked him if I am allowed to sell for 0.07 and he said yeah, but resellers rules are that we should charge at least 0.09 and he said if they will see that I am selling for cheaper they will try to harm me ...

so its your decision to buy for cheaper and save some money or pay full price .. i dont care actually
