Why do I deserve being upgraded to Ub3r?:

I feel that if I was a UB3R member, it would allow me to help out the community even more, help warn other users, and so much more. I would love to have UB3R. Not only could this help me help the community, but I could go ahead and even access sections which I currently can not. If I am able to access sections which I currently can not, then I can spread my knowledge even further. Even though over the last year I have made quite a few bad mistakes, and I greatly regret them, I have tried to redeem myself at every turn.

What have I done for the community?:

I have helped the community when it comes to teaching people basic security for online, such as doxing and coding. I plan to write several HUGE threads to help out this amazing community, and possibly even put some of my personal private methods out there. I also dox people for free for the most part, and I also love to help people run a email through my databases, etc. When it comes to coding, I haven't been to active in there but I really plan to get more active and involved in it some more.

What is Consensus about?:

To me, Consensus is about generally agreeing, or being nice to everyone in the community. I believe that it is like a family to the members who are in it.

Writers note:

I know I had a community alert opened on me around a year ago, and as I stated above I made mistakes, but I am trying to redeem myself. I want to become a reputable member on HF, and help everywhere. I am a completely changed person.

Why do I deserve being upgraded to Ub3r?: I deserve to be upgraded as I have done my best to remain HQ and helpful in the hacking and news forums. UB3R can only help me improve the quality and support for my posts and PM's.

What have I done for the community?: A healthy collection of hacking & programming eBooks, completely free for all members.

[Full walkthrough for HackFest 2016 CTF challenges.](#) (I only need to escalate privileges and will post another one)

[Fairly detailed news updates on cyber security.](#)

General help in Beginner Hacking & Pentesting.

Free thread designs and GFX for members.

Plenty of free DB lookups for a variety of members.

What is Consensus about?: While I haven't been closely associated with the group. From an outside perspective I would say they were well-informed individuals that come together and make profit in a variety of cryptocurrencies. Overall you lads & lasses seem like great people. ?

What have I done for the community?: Lots and lots of shit posting and helping.

What is Consensus about?: I'm pretty sure [this](#) answers the question.

In all seriousness though, good luck to those who enter. I would also like to ask if you are required to be ub3r approved since its not in the thread.

Damn, was hoping for a 50/50 chance there... ?

Why do I deserve being upgraded to Ub3r?: Well, honestly I think I deserve it because I've been here for quite a long time, and I've been very active on this forum. I'm always active in different sections and I'm always helping the people who is in need of it. Another reason why I also wants to be upgraded is because I never felt how it is being upgraded to Ub3r I never experienced the ability to be upgraded as an ub3r member & I know many members on here haven't experienced that too. I would also like to be upgraded so I have access to many things such as junking threads etc.

I feel I've been on this forum for too long now and deserve to be upgraded. I'm not those members who just registered, and believe that deserves Ub3r already and gets closed within 1 or 2 months.

The other reason why I also want to be in the blue side is because getting upgraded to Ub3r is always something I wanted to be. If I could afford upgrading myself I would do that, but I really can't, I don't have the money and neither do I have bitcoin to upgrade myself. I also feel that if I get upgraded to Ub3r it makes me more addicted to HF and even more active than I am right now. I've helped many people especially in the "League of Legends" section since from 2015 to 2017 on HF and I hope you will considering upgrading me to Ub3r.

I also once had alot of money that I could use to upgrade myself and even buy myself awards, but I didn't I instead used it to donate to a guy who had some serious problems IRL, he was in need of money, so all of my \$50 went away to that guy and I'm here now with nothing left, it was a good friend of mine. I'm not saying this is a reason why I deserve Ub3f but this is one of the reason why I can't afford to buy myself Ub3r right now.

My posts lately been very helpful to other members if you check my posts out. Also I've contributed contest to HackForums & is also active in this section "Member Contest" section

What have I done for the community?: Here is some of my contributions:

<https://hackforums.net/showthread.php?tid=5598374>

<https://hackforums.net/showthread.php?tid=5600418>

I'm not gonna lie but I also hope I get upgraded to Ub3r, because I want to open some shopping/services thread, and I feel being upgraded to ub3r is good before opening threads like that. I've always wanted to be Ub3r and I hope you'll upgrade me to Ub3r. Actually that's pretty much the reason why I think I deserve Ub3r. Thank you for this contribution & sorry for the long application. Good luck to the other participants that's participating in this awesome contest.

Why do I deserve being upgraded to Ub3r?: I have been a member of HF since 2013 and I have been active since even though I dont post very much, I try my best to help all members whether

upgraded or not via PM.

Or sometime I even post on their post so everyone can see the content.

I love Hf and want to be a bigger part of it and want to provide more services and Ub3r will surely help me to do it.

What have I done for the community?:

I know these don't value much but I still to do my best and give whatever I can back to the community.

I hope that I will be able to do more in future not just for upgraded members but for everyone.

What is Consensus about?: I am not a member of it so I don't know it thoroughly but I took a look at it and read it various threads and I know that they are very knowledgeable in CryptoCoins.

They contribute a lot towards the community, some examples are:

<https://hackforums.net/showthread.php?tid=5649976>

<https://hackforums.net/showthread.php?tid=5636240>

They also post news threads related to Cryptocoins regularly.

And I really like their userbar.

Thank you for doing this contest.

I means a lot to all L33t members.

Have a good day ahead.
