Do you guarantee that this has nothing to do with social engineering and/or defrauding companies to trick them to give free hardware to you?

Your proxy selling for a banned user [Greyhat Revenue](#) . You are better than that come on

– I would never sell a product that does not work.

Egregious - July 4, 2017, 12:35 pm

I was provided a vouch copy of this method in return for my honest review. I have seen this method extensively tested in the past multiple times, albeit, not in the United States. It is a greyhat method, but each time it is completed, you'll be rewarded with voucher for up to \$350 in computer hardware. Good luck with sales.

EDIT: Tommy received another voucher today, confirming the method still works in the UK.

Convict_temp - July 4, 2017, 1:41 pm

You can go ahead and contact me on Discord @ #Tommy3435 for further information or for any evidence that this works the way it is advertised.

My previous thread had several vouches which can be referred to looking at the authenticity.

But how long does it take to actually get that voucher? And is it risky?

It takes exactly 24 hours from once you complete the first step.

There is no risk involved as you're not hacking anyone or anything.

The official company are giving you the voucher/hardware.

Meow - July 4, 2017, 1:45 pm

As said in the previous thread, this method is working and I will be expecting my payment tomorrow (hopefully).

They ship from Denmark and ship anywhere but if it's outside Europe the shipping may take a little

longer than usual, possibly an extra day or two.

I have a user Nikky. from N/A and a few users from USA/CA and one from AUS.
Contact me if you have any more questions.

Inkling - July 4, 2017, 2:20 pm

I purchased this when the other thread was up, and I did the steps and now I'm waiting until I get a reply from the company.

Support from the seller was good, and the method seems to be solid.

I'll reply back when I get a response from the company. Hopefully it works!

You'll make money, I can promise you that. Once again, if you do purchase, don't fucking leak it, from yours truly.

Receiving hardware I'm not too much a fan of; but anyway, is there any risk or caveat to this method whatsoever? You said it's greyhat, so there must be some limitation.

How exactly do we profit? Any proof of earnings?

Sir Piffalot - July 5, 2017, 1:58 am

I purchased this method yesterday before I went to sleep, the seller was very nice and helpful. I followed all the steps correctly and woke up this morning to a \$350 voucher for computer hardware which is \$300 profit. I would recommend this to anyone looking for a quick buck.

It has 0% risk involved. I have tested it and got my product. You are given the choice of a digital

voucher or hardware. Add the guys on Discord and they'll show you proof.
I am astonished,

Hey,

Bought the method yesterday and I'm already receiving my hardware in a few days. The method took probably 30 minutes to do in total so it's completely worth your time. I will update this post when I receive my item, I can only recommend this product for anyone wanting to make some quick money.

How good is the hardware you receive? Is it worth it to keep?

hopeforme - July 5, 2017, 6:15 am

What shall I do with hardware and computer vouchers? Lol. Can I build my own computer with it?

Sounds like something cool and quirky, I'm interested but a bit eeeeh personally because I don't like vouchers, I like cash :p :p :p

I'll follow this thread! I may buy eventually!

Honestly interested in this, you say hardware can you be more specific?

Very interested in this. As Dark said above, can you do this more times or is it something I can only pull off once?

Social engineering.

I am willing to bet a lot of money on this.
