Hopefully it'll works, it wont change anything to the aimbot itself obviously.

But not each weapons are made the same, when I had used AW I had so much issues cause of that and made it worse than if I was aiming myself.

formatme - July 5, 2017, 9:31 pm

AW is pretty bad compared to our cheat

lain - July 5, 2017, 9:57 pm

They plan on getting added most likely in a update soon TM

Alex Fisher - July 7, 2017, 11:43 am

Review of Product - (Overall 9.75/10)

Features - 9/10

-Has everything you would need to dominate on any server, just would like to see extra gamemode-specific features added.

Anti-Cheat Bypass / Detectability - 10/10

-I have used this on about 11 servers so far, no issues, no bans.

Ease of Use - 10/10

-After the initial login/setup of the client, it's just a quick click-and-run.

I would definitely recommend these cheats, I got them 25% off (15\$) but I would definitely have been willing to pay the full price of 20\$ for these.

?

I got this hack 4/20/2017 ended up contacting it and not liking it.. having to refund because it got me banned on several servers.

Has it changed since then? I have the paypal logs to prove, and ban reports.

Just curious if this hack is any better

I have never been banned by anti-cheat using this cheat. Not even on the big ones that mostly everyone trusts to not have any hackers on.

My only complaint is that there isnt enough features, but they helped that a lot by recently adding a lua loader, which will bypass screenshots even if you load another menu.

\$20 for lifetime is a good price especially for what the cheat is. Definitely recommend.
