Thread: [someone fuck with me and edit my logo right quick](#)

Katana - July 5, 2017, 6:57 pm

Thing I need done.

Fix the white fuzz in the transparency.

Add a backwards visor to the logo.

Some of the hair edges is pixely so if you can make it look more sharpened and not pixely/unprofessional.

I'm sure all this can be done quickly in photoshop.

Who ever does this will help tremendously +1

EDIT: What do I mean when I say backwards visor?

This is a visor facing forwards. I would like the visor to be backwards.

That's me with a backwards visor, if u can essentially do that with the logo i made above, then that'd be great.

Hey, if I understood you want to remove the white thing, make it more professional and add a
background ?

He also wants to add a backwards visor but I have no clue what that means.

A backwards visor, it's a hat w/ no top essentially which he wants turned around. Like this -

Couldn't find an icon of a visor but it should suffice.
