Thread: [\[UNIQUE\] Runescape 3 Cracker + Checker | Capture + Proxyless | No Captcha! \[UNIQUE\]](#)

Rhinemann - July 5, 2017, 7:40 pm

You can checkout my other thread, it cannot be re-opened. Check it out here:

<https://hackforums.net/showthread.php?tid=5645130>

If you're posting in the thread asking for my skype please be ready to buy, do not get offended when I remove you. I only deal via skype when you do not have the posts to PM & I'll always give you my skype to add me, never the other way around.

This does not and will never work for RS07, it's impossible.

This is the revitalisation of my old Runescape Cracker + Checker. Since the last thread the product has been improved drastically and now ready for sale again.

Features: Completely Proxyless + CAPTCHAless

Captures: Login Details, Display Name, Coin Pouch, Bank Items + Quantities, Total Wealth

Both Compact + Detailed View

Search for Custom IDs when cracking / Checking

Custom timeout, cater for all internet speeds

Export a vast amount of accounts with specific parameters

Multiple progress checkers

Information: Only supports RS3, highscore checkers will be added for both RS3 + RS07

Proxies are currently in testing, I have them working just not stable enough for release. This is the same with threading.

All bugs from previous build are gone.

Extremely stable, you can run it for days!

Checking is slow, you can use HMA to auto cycle IPs in combination with the custom timeout if you want to make it much faster.

Price: \$30 BTC month | \$30 via PayPal for upgraded members

Vouch Copies: [justg](#), [11:11](#) & [tsohg](#). These are customers of the older version, meant to share their

thoughts about now vs then.

Any current customers who are without the updates please contact me. Please do not contact me asking for my skype when you have no interest in purchasing, because of this reason all deals are now done via PM.

Pictures:

Spoiler [\(Click to View\)](#)

Before you PM me asking the same questions over & over please read this section.

Q) How fast is the checker?

A) It's not, it's based to be a checker with cracking functionality. The default settings of proxyless will crack quite slowly so I 100% recommend putting it on a VPS & letting it run, it's extremely stable. Some people use HMA to make it use proxies using auto cycle.

Q) Can I disable x & make it only do this

A) No, core functionality cannot be changed.

Q) Do you accept other currencies or PayPal as payment?

A) No, if I do it'll be written in the thread.

Q) When will proxies be implemented?

A) I have a very busy life coming upto university starting again, I have little time to come online that's why my response times are slow. I'm currently not actively working on this project, It is however stable.

On the other hand I'm also hesitant to release proxies, I myself do not use it even though i am able to for 3-4 hours at a time. This is a Runescape Checker above cracker, I was it to remain working without the portal becoming flooded & eventually fixed.

Power - July 6, 2017, 7:16 am

Works so much better than before(not that it didn't run well). I'm running it on a Virtual Machine on a MacBook and it STILL runs very quickly, no errors so far either. Naiked is very good with support and has been working hard on this, he has updated it almost everyday since I bought it. And for \$30 BTC, thats like 30-35m 07 gp. Not too hard to get in my opinion. You'll make your money back, probably the same day. Would recommend buying. :)

Wet Rag - July 6, 2017, 7:23 am

So to get started from purchasing this all we need is a combo list?

MisterThomas - July 6, 2017, 11:57 am

Vouch, works even better than before, can't wait for proxy support

Meep - July 6, 2017, 4:53 pm

Posting here for future purchase. This looks good.

Pyrion Flax - July 7, 2017, 3:49 am

Phenomenal product, phenomenal support. What more could you ask for?

justg - July 7, 2017, 3:27 pm

Great support for this project, I can see the massive steps forward Naiked has made from the first release to this new one. Could be a hugely successful & useful tool. Massive Vouch, and if anyone has question about it, don't be afraid to ask.

Rhinemann - July 7, 2017, 7:45 pm

Thank you for all the vouches & purchases! Feel free to drop me a PM if you have any questions.

CBHF - July 9, 2017, 11:49 pm

does this run email:pass or user:pass ?

Rhinemann - July 10, 2017, 8:03 am

(Jul 9, 2017 11:49 PM)CBHF Wrote: [\[CITE\]](#) does this run email:pass or user:pass ?

Both are supported bud.

sensimilla - July 10, 2017, 6:01 pm

Runs great, I've had it running for days without any issue. Made back what I paid already, cant wait for proxy support.

Huge vouch

Rhinemann - July 12, 2017, 4:22 am

(Jul 10, 2017 06:01 PM)sensimilla Wrote: [\[CITE\]](#) Runs great, I've had it running for days without any issue. Made back what I paid already, cant wait for proxy support.

Huge vouch

Currently have assignments but proxies will come eventually, having trouble with certain aspects of them because of the way the cracking / checking process works.

Kjetil - July 12, 2017, 4:48 am

i am a runescape expert

please give me a vouch copy and i will give u 1k netflix & 100 spotify accounts all premium

Rhinemann - July 14, 2017, 9:06 am

Still selling this, responded to all PMs.

Rhinemann - July 14, 2017, 11:38 am

(Jul 14, 2017 09:09 AM)Elad Wrote: [\[CITE\]](#) when paypal will be accepted?

Permanently? Probably never, but feel free to contact me to see if I'm accepting paypal whenever you're interested. I have the option to use friends but it's not 100% of the time.

Eridus - July 15, 2017, 12:52 pm

Could you PM your skype or discord, I'd like to know more about this and maybe buy, But I'm not able to pm on HF yet.

EPLS - July 17, 2017, 8:29 pm

Signed up just to purchase this, just waiting on Ethereum wallet to synchronize with the Blockchain.

Do you have an expected date for proxy implementation? Once you do this, however, I would recommend increasing the cost per license and/or a limit on how many have access to this program, otherwise this will become saturated. Maybe I'm getting ahead of myself though, I wouldn't be surprised if there are other private crackers out there.

Kapitan - July 19, 2017, 12:16 am

Is this a script for a bot client with a nice gui or a standalone program?

and can i run it in multiple rdp's at once

and aprox how many logins can it check an hour? i know it would depend on the number of hits but lets say if it they were all incorrect logins

Rhinemann - July 19, 2017, 1:18 am

Maybe I'm getting ahead of myself though, I wouldn't be surprised if there are other private crackers out there.

I have assignments to do at the moment so not really, a lot of progress has already been made but it is not stable. Also the number of licenses is already limited.

Answered in PM.

Kapitan - July 19, 2017, 6:14 am

The program runs very smoothly and is AMAZING for checking accounts, too bad i don't have any to check lol

but i wouldn't say it's viable at all for cracking until the proxy support gets added, then it will be a absolute beast id imagine due to the way it works and how many login attempts you could get before having to rotate proxy.

Hope that update is coming soon but overall this is a very well made and quality product and does what is advertised.

theblueskymen2 - July 20, 2017, 8:49 am

Interesting.

Any capture for Banned/Authed/Locked account?

How many accounts per hour?

Presuming login page is companion app? No idea how it's proxyless, lol.

Rhinemann - July 21, 2017, 9:57 am

Both answered in PM.

haydenthetaylor - August 1, 2017, 7:30 am

Hey man if you could pm me again I am still interested just got some questions you got discord?

9n8d - August 3, 2017, 2:43 pm

I'm highly interested in this product. Is there an estimated time of implementation for proxies?

TL57 - August 3, 2017, 4:44 pm

Interested, want a 99 woodcutting account or a 80 something fishing level account for it? Or a list of p-mod username list? Or the first 2,000 RS players username list for it?

Omerak - August 6, 2017, 2:58 am

Hello

How much accounts can IT check per hour?

Can i transfer gold/items or sell cracked accounts and they wont get banned?

Rhinemann - August 6, 2017, 8:44 pm

Sorry guys I have been extremely busy with assignments and they take priority. There is no ETA for proxies & I'm considering putting this project on hold for now.

Rhinemann - August 8, 2017, 8:50 am

I'm now classing this project as on hold, licenses are still available & crucial updates will be pushed but aspects such as proxies wont be expected. I advice buying this if you would like to use it as a checker over cracker.

UniWindows - August 9, 2017, 8:31 pm

I'm interested, pm your skype please.

Rhinemann - August 11, 2017, 2:39 pm

Done, going to be online for a couple of hours tonight.

oakload - August 13, 2017, 10:44 am

How many accounts per minute does it checks ?

Sharwefa - August 13, 2017, 7:38 pm

Hey can you pm your skype please? Have a few questions before I buy.

Rhinemann - August 15, 2017, 5:01 pm

(Aug 13, 2017 10:44 AM)soulnous Wrote: [\[CITE\]](#) How many accounts per minute does it checks ?

It's slow, some people are using HMA to auto cycle IPs to make it use proxies, I added a custom timeout to help with this. Otherwise I recommend a VPS and to just leave it running, it's extremely stable with the right settings.

(Aug 13, 2017 07:38 PM)Sharwefa Wrote: [\[CITE\]](#) Hey can you pm your skype please? Have a few questions before I buy.

We talked.

Rhinemann - August 17, 2017, 7:01 am

Available all day today for once, replies to everyone who hit me up with a serious enquiry.

vigas69800 - August 18, 2017, 5:03 am

Good luck and great support for the product

Rossr14 - August 22, 2017, 7:08 am

Bumping this up, online & taking orders.

Mazen860 - August 31, 2017, 2:23 am

Do you have discord, I can't even PM but I'm interested in buying

EightB4ll - August 31, 2017, 2:39 am

I am really interested by this, i will pm you later.

Rhinemann - September 1, 2017, 4:52 am

Contacted everyone who was interested. Online for a couple of hours.

Rhinemann - September 3, 2017, 10:00 am

Online & selling for a couple of hours.

tomppa304 - September 5, 2017, 8:51 am

Hi. send me private message, i cant. i want to buy it after 2 days. so 7.9.2017

Rhinemann - September 5, 2017, 2:51 pm

(Sep 5, 2017 08:51 AM)tomppa304 Wrote: [\[CITE\]](#) Hi. send me private message, i cant. i want to buy it after 2 days. so 7.9.2017

Contact me when you're ready to buy.

Rhinemann - September 7, 2017, 3:00 pm

Tomorrow is the last day of me accepting PayPal. If you're interested after it'll only be via BTC.

wally543 - September 7, 2017, 3:08 pm

How quick is this? roughly how many accounts a min can it check?

maikuthe1 - September 7, 2017, 3:09 pm

Wow! Looks great i will test it!

Rhinemann - September 8, 2017, 6:31 am

So today is the final day of open PayPal. After it will be available for upgraded members only after this to cut down on the amount of trades on the platform.

James Bond™ - September 8, 2017, 9:54 am

So catch me up on the progress of the program. Is it still effective to be run proxyless or is it recommended to use proxies?

Rhinemann - September 9, 2017, 5:26 am

PayPal is now only available to upgraded members. BTC is the main form of payment now.

kryptman - September 9, 2017, 4:32 pm

I cant pm. Please add me on skype. live:mpgh.kryptman

Rhinemann - September 10, 2017, 5:07 am

Online & taking orders. Contact me via PM to deal.

Lukas - September 10, 2017, 5:10 am

This is really neat, never seen anything like it before. Once you publish a version of it for 07, I'd be more than glad for you to take my money.

tomppa304 - September 11, 2017, 3:29 am

Is it working now? not working for me right now

OP: Since you are selling the project, will this still be worth buying?

Rhinemann - October 4, 2017, 7:47 am

(Oct 2, 2017 11:01 AM)Davy Wrote: [\[CITE\]](#) Cool ty.

OP: Since you are selling the project, will this still be worth buying?

I do not intend to take a low-ball offer for the project in desperation. All original licenses before sales will run safely on the builds you have. The owner will be given a different version of the licensing software for his distribution of the product or whatever he/she does.

After sales licenses will not be sold.

Rhinemann - October 8, 2017, 10:38 am

Pushing this thread up, sales will soon close as I intend to launch the new module as a new project. Much progress has been made but towards the initial goals but there are still some bugs to iron out. Let me walk you through a new few of the new advancements, these are just initial tests and it's unlikely that the design will stay the same. Any suggestions from here would be greatly appreciated.

TL;DRSocks5 proxies are supported & working.

Multi-threading is possible but I'm looking for a better solution.

Hiscore checkers for RS3 is fully functional, RS07 will soon follow (my current task)

Fixed all export options, made hiscore checkers directly compatible with an export option

This version is not and will not be public for some time. Do not PM me about it or ask when a release date will be announced.

Hiscore checkers are partly complete. I decided I wanted to add RS07 support for just the hiscore's as display names stay the same over the new platforms. A lot only play RS07 so this is actually a huge improvement towards supporting both servers. Granted a small one but c'mon, I'm going slow. Development is extremely slow as I've just started university again.

I decided to go back and give proxies another shot, initially I intended to stop trying to add both HTTP and SOCKS5 proxies and just made SOCKS5 supported. The portal used has a very weird loading bug where only certain connections can connect, you need pretty good proxies for this to work for you at the moment. I'm looking for a way around this but at least it means proxies are supported.

Adding multi-threading is strange, because of how the project works one version is launched as a single entity. Multi-threading seems to act as sending two instructions to the same entity which conflict. Because of the process in which checking is taken this simply isn't possible. Launching more than one version of the driver could work but memory usage is a problem and sometimes they are conflicting with each other.

Jeroen1887 - October 9, 2017, 2:54 am

Hello,

I'm very interested in buying this. But i can't PM can you send me a pm with details on how to buy this?

Thanks!

interested but, what do you need to start running the tool?

do you have to have emails or usernames or anything like that? sorry im a smith and just saw this.

EPLS - October 18, 2017, 7:52 am

Anyone know where I can get high quality combolists? That might be a dumb AF question since you'd be using them, but even a hint to the right direction would be enormous help and lead to me buying this program.

Rhinemann - October 18, 2017, 3:42 pm

Sales are CLOSED. The source has been sold. This project is no longer being developed by me, all remaining licenses will run until their time is over.
