Hey I actually subscribed to this guy before seeing this post. He is amazing, teaches me a bunch and he got me into arduino and a little bit of hacking.

He hasn't been really active lately though...

Most of Seytonic's stuff comes from another guy SpaceHuhn. If you check out his stuff on Github, you will find other fun and entertaining projects that he has worked on.

NinjaLeaks - November 19, 2017, 6:06 pm

Yeah been subbed to the guy for a while now, makes some cool shit :)
