Hey fellas,

Here I am again, this was my first thread post which Horus made me delete first because he apologized. But then he decides to play games and call me a scammer. Now here we go for the real truth:

I am gonna keep this short and simple:

-Bought crypter for 1 month
bought crypter for 1 month

2 weeks in - native stub doesn't work, scanner broken for 1 month (even tho advertised), crypter crashing

doesn't reply to any Skype messages for days/weeks

replies to skype messages once i post on his thread

windows defender starts getting detected again and again

he doesn't want to help me nor does he respond, tells me to do this and that but not focusing on me

i tell him to refund me because i can't bear this shit anymore, he apologizes for his noob behaviour and promises me help + 2 week licence extend

i accept, but then again the same problems over and over again, he also not added my + 2 weeks to crypter

i said i want refund now he said ok within 48 hours.

i waited over a week, he never replied on skype, i wrote on his thread, he replied

said he is gonna ban my licence because i work with some cracker and because i wrote on his thread again

I open community alert on HF, exposing this Horus guy and his support

They get a lot of shit from many users, some users also pm me asking if they should buy that software

Suddenly they decide to apologize to me and offer refund

I tell them I paid 30\$, he showed me proof I paid 15\$

after long discussion I agree to 15\$ and then he decides to open a thread on HF saying I am trying

to scamming him for 60\$

????????????????????

Here is the full unedited Skype Chatlog so everyone can see what kind of shit is going on here.

Decide yourselves if you deem him trusted. I have nothing to lose, he has.

I think he can speak for himself, are you his dog or something? Your rep already showed me on which side you are :)
