Looks really cool, the real deal

If this was a painting, that would be sick

Good job, only a little detail that bugs me a bit. The thickness of the strokes is uneven (sudden transition) (if that makes any sense). Its really not a big deal at all i just thought i'd point it out. Awesome nonetheless!

Design looks sick man. Personally the font doesn't do much for me. I would work on some lettering styles and create more of a calligraphy lettering style. Besides that, you did a fantastic job!
