Thread: [Need some help \[PHP cURL/HTTP Requests\]](#)

Justajoke - July 6, 2017, 1:00 pm

Hi there, i am looking for someone who are able to help me out with my issue, so if you're familiar with PHP cURL and an expert with cookies/http requests and more. Please do not mind to holla @me on Discord: Justajoke#7043 | Gmail: testforthisguy@gmail.com

The issue is that i am kind of struggling with some recent functions that I recently made which uses PHP cURL and i was hoping someone could help me out to make the function work. The issue is whenever i would use my script and try to make it run it would be persistent, However I would like to keep the session alive for as long as i want rather than it being persistent and constantly booting me out or even giving me negative outputs that i don't want. I am hoping if someone can help me out and I would really appreciate it. Also please notify me if you need more information about this if you're the right guy for the job and are up for it.

For the complete information please do not hesitate to contact me and please be honest..

Thanks!
