Thread: [Re: Professional Sleek Design](#)

AdmiralHere - July 6, 2017, 6:01 pm

Hi,

I am looking for a sleek design for my RAT help desk that also looks professional but catches someone's eye. The colors I'm looking for are like a fusion blue (yes when you google image it, it's the color of the new fusion blue, that's the color I'm talking about. ?

Like a frost white & fusion blue, thank you for doing this for me. I'm not sure if I'm allowed to offer donations, but if an admin would be able to comment on this topic I would be greatly appreciated. If in fact I'm allowed too, I would be more than happy, but if not the rules are the rules. Thank you all.

RAT - Remote Administration Tool Help

Setup
Consultation
Advice and more!

Dark Comet, Imminent Monitor, J-Crypter, and much more supported!
Skype: Starsetmarketing@gmail.com

Signature & a full page ad would be amazing? If you can't do either I understand, thanks for what you guys do! You rawk!

Here are a couple links to my Google Drive. Let me know what you think. If you like the design, we can discuss a full page ad.

I like the design but is there any chance you could try a different font? ?
