Thread: [White screen between every page](#)

Alexander - July 6, 2017, 6:33 pm

I get a bright white screen whenever I go on Hackforums, and in between every page i visit on the website. I can't use the website atm lest I go blind. It happens only on this website, on every web browser.

Is it just me?

Meow - July 6, 2017, 6:33 pm

Have you tried clearing cookies & cache?

ComputerJi - July 7, 2017, 12:50 am

Never had an error like this with HF.

Would suggest reading [this topic](#) if you are using Chrome.

Corwin - July 7, 2017, 12:50 am

Every time I post I get some sort of site error, not sure why.

CYB3RM4N - July 7, 2017, 12:51 am

Clear your browser's cache and cookies, then restart your browser.

Yup, still happening to me on my end as well. Just gotta wait til it chills out I guess. D:

Sam V2 - July 7, 2017, 1:14 am

DDoS.

Omni said earlier that there is still an ongoing attack and that is causing errors.

Horus God - July 7, 2017, 1:21 am

same problem i have
maybe site under attack

NurSpec - July 7, 2017, 8:24 am

Had it earlier but it seems to have fixed itself.. felt like a server lag issue more than anything else.
