Thread: [Will Coffee/Canon lake use LGA 1151?](#)

Ultra Instinct - July 6, 2017, 11:25 pm

If they use a whole new fucking socket for coffee lake, I'll be pissed.

Pretty sure Coffee Lake will be on socket LGA2066, chipsets should be:

Z370

H370

B360

H31

If what I read a few months ago stands true...

Some "rumors":

<https://www.pcgamesn.com/intel/intel-14nm-coffee-lake-release-date>

LGA2066 is X299 their "enthusiast" platform. I don't see them putting Coffee Lake on that.

I think the last rumor I saw was that it was going on LGA1151, but as I said, it's just a rumour.
