Thread: [Scammed by Vyrez \(\\$10\) uid: 2439716 - Selling Public Methods](#)

True Money - July 7, 2017, 12:36 pm

I bought his ebook: <https://hackforums.net/showthread.php?tid=5266312>

I was essentially scammed. I've seen the method included in a free csgo ebook before. I would like a refund. It is 6 pages of trash written in 100 font. I can't go into detail, but its shitty e-whoring for CSGO.

I want a full refund, even though I know I won't get it.

proof of purchase:

proof of the shitty quality and length: (blurred)

he says "multiple methods", yet there is only one:

the ebook is basically this, especially the end bit:

Receiving a shitty product is to be expected from buying a method for \$10.

But if you received a method which is already publicly posted and free that should warrant something. So if you claim you've seen the method in a free CSGO method before then prove it.

Lol, my computer was wiped when it was seized. Its not gunna be as easy as that. If you looked at the method yourself you'd probably know it. I will try to find it.

Also, you seem to think that its OK just because I paid \$10 to receive trash. Its not.

1. It's your fault for buying a e-book.
2. There's no refund policy, so Vyrez doesn't have to pay you back anything. You bought the product, and received the product. It doesn't matter if you believe the product is "shit".

I can go to a store with a no refunds policy, and buy a apple. What I can't do, is then go back to the store, and demand a refund because I thought the apple tasted like "shit".

If the apple was black inside and had a worm in it, I think they have to pay you back. If you buy something and it promises something it isn't (non-saturated) which it is. You deserve a refund.

No.

It's a apple. When you buy a apple, you run the risk of it having a worm in it. That's why you check for holes in the apple before you buy it to make sure that it's not black inside nor has a worm in it. They promise you, it's a apple. Which it is.

When you buy a e-book, you run the risk of it being shit. That's why you check reviews and posts on the e-book before you buy it to make sure that it's not shit. Vyrez promised you a e-book, you got one. You only lost \$10, which is completely your fault for buying a e-book in the first place. I would say for such a small amount, it's a lesson learned. But since you didn't even shill out the extra five dollars for the "extra methods", I won't.

There are quality controls in place. If you get a worm in your Apple and you complain, you could file a lawsuit. It seems unrealistic, but you could. So they just end up giving you a refund to avoid legal battles and since in this scenario every single apple has a worm in, you would be seeing investigations from safety regulators.

You're talking about a settlement. Yes, they do that most often because whether the lawsuit is rightly filed, or wrongly, it's probably cheaper in the long run to just give a lump sum then to pay for lawyers. But you're complaining about ten dollars for a e-book on a online forum. I assure you, this will have absolutely zero effect on Vyrez's income from his products. This isn't a multi-million dollar corporation, or a courtroom. It's a forum. And refunding you, just isn't in the picture.

You got what you paid for, and just because you think it's a shit method doesn't give you the right to ask for a refund.
