Thread: [EnigmaBot- Sell and buys CS:GO keys using Bitcoin](#)

BR?ND?N - July 8, 2017, 1:08 am

EnigmaBot

Enigma and I have decided to partner up to bring you EnigmaBot.

The bot sells and buys CS:GO keys (or TF2 Keys) using Bitcoin, via trade offer. It uses the block.io API for bitcoin, and is configurable to do special things like add users to a group after the trade has completed.

Enigma was the genius behind the bot, and will be the one handling all questions for his bot. I will assist in all payments, I am a known middle-man on HF and have assisted various members with high dollar transactions, and various advice. The reason I partnered with Enigma is because he had a great product, but wasn't getting the attention it deserved due to his status on the forum. I wanted to help bring this product into the spotlight it deserves.

Contact me only to purchase the bot. For all questions and information PM

<https://hackforums.net/member.php?action=profile&uid=3628354>, I will ignore all PMs asking for bot info or advice. Once again, PM EnigmaCenter. Only PM me to buy, and for questions regarding payment.

Other features include:[] Chat commands: get current price of BTC, detailed instructions on how to use the bot, info on the bot itself, and price calculator.

[] Enters non-Steam game showing amount of keys available and current prices, looks like this

[] Checks any clients steamreputation. If they are blacklisted the bot will ignore any deals with the person.

You can visit the bot live @ <http://steamcommunity.com/id/Keys4Btcc/>

Purchase of the bot also includes lifetime support and updates to the bot. Enigma written the entire thing himself so he knows the code inside and out, and he can fix bugs and add new features free of charge (assuming the features are small, bigger features that take >30 minutes may have a small fee).

Requirements

There are a list of requirements to set up this bot which will you can find out here>[] A vps or dedicated server (for hosting the bot online)

[] A mobile phone (just one time for the mobile bypass)

[] A new steam account for your bot (used for buying/selling keys)

[] A account at www.block.io (using the api for your bot)

Setup Guide:

You can view our setup guide @ <http://enigmacenter.net/enigmabot.html>

Price:[] \$50 for Lifetime

[] Lifetime + Setup bot for you = \$75

TOS:

[] You may not resell the bot

[] The bot will be given out after the 2nd confirmation if paid via BTC

[] Allow 24 hours for the deal to be completed. We are human.

[] NO refunds after bot is given out.

[] Not allowed to remove branding of bot unless told by Enigma otherwise.

[Buy Now](#)

or you can contact Enigma or myself to purchase directly @

Looks pretty good. Pretty cheap too, but steam bots aren't my taste. Best of luck :)

THC - July 8, 2017, 1:21 am

Really cool idea, I actually really love this! GLWS :D

Thank you M.D

I would not have put my reputation on this if I didn't think Enigma and his products were quality.

Looking forward to getting it going!

EnigmaCenter - July 8, 2017, 1:56 am

I am the owner of EnigmaCenter Brenden is my official seller for HackForums

This is correct ?

I will be heading to sleep shortly, but guys feel free to PM me if interested in purchasing and I will get to you in the morning!

First buyer already bought at a steal of only \$25. The price is now \$50, which is still low for what this bot can do.

DelziumTheProudWhale_temp - July 8, 2017, 2:39 am

Imao

natsuki. - July 8, 2017, 2:44 am

Really interesting, even at a low price. Congratulations on the job! ;)

Thank you. We had our first sale
Considering the bot is a public steam account, this doesn't surprise me. Not only is HF often cringy, Steam is just as cringy.

We take those with a grain of salt ?

I like this!

I might use it myself in the future.

What a great product you two have created.

Well the credit goes to Enigma ;) He's the coder, amazing what the guy can create. I have no clue how to do that.

I handle the thread and payments, it's what I'm good at ?

Charm is the co-owner of our Discord server, he is a good friend of mine.

He may actually be serious :)

I will be on for a few more hours today, so if you're looking to buy or you're considering it. PM me!

Due to Enigma recently becoming a father he is selling his projects.

This bot is included.

Those who bought the bot will be kept updated.

I am no longer associated with this bot. If Enigma decides to find another person to sell for him, he has the full rights to do so.

Thank you all.
