Thread: [MAKING A SHOPIFY STORE ! YOUR SHOPIFY STORE ! START SELLING NOW ! BE A MILLIONAIRE !!](#)

Mizzy - July 8, 2017, 7:24 am

I have made 2 stores for users here on hackforums. I have sold 3 start ups stores also here on hackforums.

I am offering a service ! I will make your shopify store.

The store will have your niche. You will explain how do you want the store to be, I will make it.

The price and the time the store will be made depends on the store you will want.

The store will have a NON FREE theme.

The store will be with a 2 months trial !

I only accept payment via BitCoin. Payment will be made 50% before and 50% after.Or 100% before.

Risk of getting scammed : 0% ?

Are you just buying (or ripping) a theme and editing the design? Or are you also going to set up: branding, product images, descriptions, optimize it for SEO, send us all graphic resources used, etc.

What is the price range you usually work with? Portfolio?

I might be interested depending on your response.

This is an interesting service - what's the average price range?

Danny Khalifa - July 26, 2017, 5:30 am

I will pay you the price you want, if you create a a good store for me.

Let me know via PM, we can discuss.

What does your service include?

You state you will make me a millionaire, but how do you plan to do that? From what I can see, your service seems to just create a Shopify site. If that's the case how could I possibly drive sales? I'd hope your service includes marketing the site, and possibly finding the niche. That's really the only things that would make it worthwhile. As mentioned above optimizing the SEO could be a good way of going about things.

I'd also hope your service does more than just create the Shopify site as it is extremely easy to get started with a Shopify store, when I made mine, it took me about a day. That included the purchase of domain, Shopify custom theme setup and code, graphics (including logo, brand guidelines/color palette, slogan) and even populating the store with items.

You stated that you have setup 2 stores already for users, would you mind letting us know how those are going, sales wise? Were they successful? Are there any metrics you can share with us?

All-in-all, based on what I stated above it looks like a decent service that might come useful for people who are lazy to spend a day setting up a site. But, I personally wouldn't consider unless the service included marketing the site.

I just fully set up the store. With everything.

I don't know if the store I made have sales.

The store will be good , sales depend on your ads.
