Thread: [\[MONERO MINER\] User sends miner which works on HIS OWN MONERO ADDRESS! UID = 547916](#)

franklin83 - July 8, 2017, 8:25 pm

Hey, today I've purchased a miner from a guy called Riddick (UID: 547916)

I sent to him my monero address for which build should be binded.

he sent me a file, before uploading it to my rig tested it on VM.

Results are here:

File was binded to other monero address, probably his.

also owner claims fake features,

it should mine with 2 threads (50% cpu) instead of 1.

Lost \$10 so isnt much, but anyway he wanted me to mine for him, that sucks af.

bumps here and on his thread so he wont scam more people.

Tbh you're right, I agree.

Riyu - July 8, 2017, 8:33 pm

Looking into his history, he has open scam reports.

Also, you should edit your rep on him. It isn't a deal dispute so you can't say the word scammer or imply he's a scammer.

5 am mini modding lol

Hopefully he will refund you OP, or atleast fix the address

That's right, my bad.

Not sure if its even his miner or XMRMiner's.

Ninetales. - July 8, 2017, 9:38 pm

I paid for my miner and got what I expected. It must have been an error.

Are you saying you got a stub that was not your address too?

No lol I just downloaded the file and did some debugging on it, the link is visible in the thread.

Oh. Well, thank you for clarifying lol.

Mr. Robot - July 9, 2017, 1:43 am

Haven't bothered checking it out fully yet but it would make a lot of sense considering the low rates I was getting.

Donald Trump Jr. - July 9, 2017, 1:46 am

Scummy but genius to do this.

Mine looks alright and got it from him so I think i'm good.

its a old cracked version of XMRMiner's. Not sure if all features which he claims are here in miner.

also owner claims fake features,

it should mine with 2 threads (50% cpu) instead of 1.

Asked him yesterday, he has claimed that is a old cracked version.

Probably yes.

Riddick - July 9, 2017, 6:33 am

This has been resolved, it was simply an error by me. I've sent Seebix the corrected version and offered a partial refund or another build for free for the inconvenience.

Oh really, I have open scam reports? That's news to me, because I simply don't have any at all.

Sirhofiio - July 9, 2017, 6:35 am

no wonder mine perfoms badly with just 100bots as a test started with 10 boats increased it further still same hash rate

Try reading the thread to find out what happened. Also, try reading the guy's rep who started that thread, he's the real scammer. So, yeah, you said I had open scam reports. That's one thread I've just proven to be false, care to share any more? Good luck finding them because I'm not into that. I won't be looking at this thread anymore, since this has been resolved as much as possible at my end and apologies for the mistake, OP.

Edit: Before I go, to prove this was simply a mistake, feel free to ask other customers for samples of their miners to see if there's anything "binded" or "suspicious" as you won't find anything untoward at all.

I read the thread.

It's still a scam just because you didn't like the method doesn't mean you don't pay for it.

Also funny how you're not responding to the guy talking about you stole code from a cracked miner

?

Sirhofiio - July 9, 2017, 6:52 am

riddick you are trying to dodge the question and accusation brought against you if you truly wrote it you would defend your workpiece gallantly

(Jul 9, 2017 06:46 AM)Friedrich Nietzsche Wrote: [\[CITE\]](#) Still ignoring the part where you are selling a cracked silent miner AND false advertising (because anti sleep does not exist in XMR Miner's miner). Perhaps you are ignoring it because you feel you have no proper defense against it?

He didn't steal code LOL, the entire miner is stolen. Guy hex edit the address thinking he could get away with it.

Still browsing but ignoring the question. <https://i.imgur.com/7ep6lOJ.png>
I said I wouldn't come back to this thread because I've posted what I need to, but you should check your PM. As for the other guy regarding the "deal dispute", you're entitled to your opinion but I have never scammed anybody. Now, I will not be returning to this thread, if you want to contact me just drop me a PM.

Look again at the cNpare screenshot, you clearly use the cracked miner.

All the information regarding his miner are posted here as well as his promise to post a picture of his rear on HF.

good job about exposing that guy.

hoping to see him banned soon from omni.

thank you everyone :)

I bought a miner from the guy (reddick) , He was super understanding and nice when I had issues with payment. I am not sure if this is normal or not.. This is screen shot was taken at the moment. So pretty much its running in the background but its not showing up on the mining stats. I dont/ not trying to jump to conclusion. IS this normal or ?

u'r using port 3333, check what's the difficulty, if higher = u have wait more to get shares submited.

Also if you are using other port than 80 firewall may block it, use always 80 (default as http)
