Huge vouch for VictorY and InstaLight! (Jul 14, 2017 11:07 AM)Mr. Reviewer Wrote: [\[CITE\]](#) -It's recommended an older account due to some perks you have but works also for more fresh accounts within limits. And provides examples where to buy them from in case you really want an older one.

-You need a niche if you don't have one already. Most people already have one.

-Gives you an idea on how to promote your content better to the public.

-Provides information on how to make your Instagram more appealing to the public, how to choose your avatar, pictures, how to make them more interesting, etc.

Few psychological tricks to attract people.

-Provides examples on how to use the right hashtags and a source where you can create them.

-Provides a tool to "farm" the content that you put it on your own IG.

-Provides a tool to automatically post on your account at the right time.

METHODS:

-Provides four methods to grow your followers base.

•First method - It's sllightly risky if you have a new account. But the seller provides what limits you should follow. Requires a bit of work.

•Second Method - This is a bit more advanced, if you already have a few hundred followers, provides few examples, how to engage other peoples profile.

•Third Method - Similar to the first method but paid. You're going to pay for some tools that will do the job automatically for you.

•Fourth Method - Convincing competition to do something with you.

-Some things will require a bit of creativity.
