What is the most popular/watched anime right now in your opinion?

Probably Sword Art Online. I feel like everyone who has seen any anime series has either heard of it or watched it. Other than that probably something like Highschool DXD.

Opana - July 10, 2017, 12:48 am

Attack on Titan probably. Season 2 came out recently, and it was much awaited.

Death Note is also pretty popular with people who don't usually watch anime.

There are way too many popular animes to be honest. Some such as One piece, naruto, HXH, AOT, my hero acadamia, etc.... Just way too many to list. I suggest looking around the anime section for the recommended animes that people have suggested.

One Piece, Naruto, Dragonball Z, Fairy Tale, and HunterXHunter are probably the most watched animes.

According to MAL, Death Note is the most popular anime, unfortunately.

Sword Art Online without a doubt, that show is massive somehow even though it's not great.
