You mean high odds? Or just tips under 1.5 that have 90% chance of winning?

Last reply I got from you was 3 days ago where you said you get validation error using blockchain. Last reply I got from you before that was over 2 weeks now.

If you get a validation error using blockchain I'd at least expect you to have the common courtesy to take less than 2 weeks to tell, and MAYBE possibly come up with a solution rather than just telling me you can't send me the money YOU owe me.
