Cypical - July 10, 2017, 7:15 am

You sure you made every single icon/color scheme and this isn't just a template?

Designer - July 10, 2017, 7:20 am

The icons are from a premium icon pack which was \$127 I believe. For the footer I used Material Design Icons which is open source/free and then of course there are the logos of various distributions which I modified (color wise).

As far as colors go, I used what I thought would work well. It's not a defined color scheme you can find somewhere lol. What exactly do you mean with "a template"?

I'm a fan! It is very long and has a bit of white space you could probably cut down on.

I always love the 'bootstrap themes' (thats the first thing that comes to mind when i think of this style), and this is a great take at it, honestly i would say 9 or 10/10 for this.

I hate Bootstrap. Never used it and never will. Ugh.
Thanks though lol.

This was laid out real well. The line height for type is harmonious and creates a great flow, pretty good organization of information. I'm able to quickly scroll and scan all the information and get a gist of the product.

Looks really well made mate ?

Carlito85 - August 31, 2017, 5:41 am

Very clean and professional. Only 2 comments.

1. I don't link the 'color cut' behind the dashboard panel. It is superfluous, it may be removed or moved to divide the pricing for the dashboard.
2. It is ok to put the pricing near the end, after you explained all the values of you products but it should be more highlighted since it is crucial information.

Hope it helps!

Thanks for the comments xiffed and Carlito85 ;)

Charm ? - September 10, 2017, 8:27 pm

This is clean. I like it.

Idk if you can fix the antialiasing on the purple parts to the white.

After I looked at it that way it started to bother me.

[This font](#) - Not the cheapest font. Same font Spotify and AirBnB use for the logo and branding.

zetza - September 16, 2017, 12:20 am

You're not selling the reviews, even though it's a good sales tool.

But after you get all this "way too good" offer, you want some ethos (trust), which you get from the reviews - in the end.

There are different ways of course, but it seems a bit desperate to put it at the top

johnwd - September 25, 2017, 6:23 am

Veeeeeeeeeeeeeeeeery nice!
