Thread: [SpyNote \(Android RAT\) working? Problem with disconnect](#)

yosuase - July 11, 2017, 3:57 am

Did someone test SpyNote v4? I have a problem with him, it's connected with device but often disconnect after a few seconds.

its look like: imgur.com/EwjTrOi.jpg

In apk builder settings checked "root", "protected" "wifi-connection".
"Cpu wakeicok" is unchecked.

Someone knows a good RAT for Android who shows sms, can send sms and delete them? I bought netwire, which also does not work, DroidJack it does not show the countries and also the same problem as with SpyNote.

mushroom88 - July 13, 2017, 8:44 am

having the same issues, I found ahmyth is pretty reliable but not to many features. let me know if you come across something

Mr J0keR - July 13, 2017, 11:47 am

SpyNote stability is SHIT .

yotoprules - July 13, 2017, 12:22 pm

SpyNote was very reliable and worked almost perfectly for me. Just the minor bug here and there. Maybe it is a problem with your network or your phone is not powerful enough.

dru123 - November 9, 2020, 5:10 am

ik its late but have you guys figured it out i really need too know cause i have a hackathon and i was planning on using this tool

CatLicker - November 9, 2020, 12:11 pm

I don't know about v4 but v6 working for me pretty good
