Thread: [Nike Huarache Vector Illustration \(4 color variations\)](#)

AvessoVision - July 12, 2017, 2:34 am

This is actually my first time working on a shoe. Haven't used Illustrator for quite some time. Although I added the color and shading in Photoshop.

I got inspired by Novica since his style uses a lot of flat illustrations with simple shading & highlights.

I have made 4 color variations for everyone to pick their favorite. Could have made more but there are endless combinations.

Removed the background to make a nicer showcasing of the shoe.

What's your favorite color combo? What shoe should I try doing next?

Dude, these are absolutely amazing. Personally my favorite ones are the top right corners. For your next shoe you should try some Jordans dude. 10/10!

They really look good

My favorite ones are the blue ones.

Thank you,

I was actually thinking about some Jordans maybe even Air Jordan 1 Retro High.

Damn some of those colors don't match, but they look fire.

I would by 2 and 3rd ones, they look amazing. But on the first pink/white color combination looks a bit strange.

Thank you,

I did them with no research. I find matching color and nuances on shoes quite difficult if you want to come up with a really sleek combo.

Thank you,

These combinations had my head spinning. Tried so many, yet I cannot post every single one.
