Thread: [How to get and use Jabber/XMPP?](#)

eskimo1 - July 12, 2017, 7:41 am

Hello.

So I decided to get jabber - turns out there's a million different clients that can do different things. So I was wondering - which is the recommended / most popular client?

Regards

Pidgin is a good client I can recommend it, dont forget to get OTR for OTR chats.

What does it mean Pidgin & OTR in xmpp?

I've just gotten pidgin, but is otr another thing I download and run together or something?

There's tons of resources and guides on Google. A simple search would answer your questions.
Don't expect to be spoon-fed!
