Thread:

<https://hackforums.net/showthread.php?tid=5655378&page=5>

Profile: <https://hackforums.net/member.php?action=profile&uid=2548118>

So, I was friendly as hell with this user to start with.

Messaging over discord I offered to help him protect his cheat with better obfuscation and too help him stop debuggers etc.

Payment Proof:

ETH:

<http://prntscr.com/ftl50r>

PP: <http://prntscr.com/fv9lme>

VAC Ban proof:

<http://prntscr.com/fv9l9v>

Also,

I couldn't connect to the AUTH so i sent him the error i was receiving,

He did offer too team viewer however I don't teamviewer to stop files being taken.

Overall, he was a nice guy but is always denying he's had 0 bans over 6 months of the beta.

<http://prntscr.com/fv9mgf>

<http://prntscr.com/fv9mna>

'No ban

6 months

Playing every day

Rage-ing all the time

Playing DM's on this account mostly

Only 1/2 competitive's, on my alt (main) account

Still not banned, LME'

<http://prntscr.com/fv9ndy>

I know it's only \$15 but he's trying too say I'm lying when I've never used a cs cheat before

Cheers

because it's most likely a copy paste cheat

dont buy cheats without knowing what you're doing.

He said this wasn't a copy and pasted cheat.
Coded from scratch

I invite everyone to ask personally every other subscriber we have up to date, even the oldest ones, none of them got banned, let me provide screenshots also of the chat, but you can always ask them personally.

Edit [13.07.17 (19:21 Local Time)]: Another user responded: <https://i.imgur.com/jMamvSM.png>

I asked other subscribers, but not all of them are available to answer that quickly, some are busy perhaps, but I'll provide more screenshots when I get responses. I believe it would be very retarded to open a community with detectable cheat and start selling, of course everyone would want a refund, if someone else was banned, I'd provide a full refund, but since he has no evidence that he used only our cheat, I cannot issue a refund. One of our oldest subscriber and beta tester has been playing on his main competitive only for 6 months, not a single ban. I doubt that we're detectable. If we were, all other users would've been banned as well or atleast one more. Keep in mind VAC Bans can be delayed up to 2 months :)

Note: I wouldn't really open a scam report stating that you were friendly.

Kind Regards,
MaxVelocity,How am I supposed to show evidence I've never used a different cheat???

Precisely

You'd have to take my word for it.

I asked for a refund and you denied it due to accusing me of using another cheat which this is my first one -

I only went for it since it was cheap and said undetected and there were vouches on there.

NOBODY else is banned. Why da fuck do you think our hack is detected?

You are the ONLY ban. Ask our other customers tbh.

It is YOUR fault, not ours. #

Also: you saw the refund policy on our thread? Yeah exactly, there is none. Cause we dont offer refunds.

And for the last: Who da fuck are you that you think we will give you anything when you open a deal dispute? You dont contacted me before just opened this deal dispute and neg repped me.

Dont expect anything. Specially not a refund we never offered.

If he was VAC'D then the cheat is detected.

But if OP was game banned then it would be op fault.

That's pure sign that he used another cheat or someone used his account.

clearly you did something on your account that get you flagged eventually to a VAC ban.

Please don't blame this on the cheat especially you don't even know what cause your VAC. (most likely yourself)

All I see right now is the two owners of the cheat ganging up on the guy who is calling their hack out. There are only 2 possible things that could have happened.

1. OP used a different hack at some point. (clearly stated he didn't but there is no way for us to

confirm this)

2. The cheat is detected and they are just trying to denial all accusations to keep their sales safe. (seems kinda sketch since the only voucher is a new member.)

eskimo1 - July 13, 2017, 11:42 am

Come on now, OP is obviously not satisfied with the service and has had a bad time with your product.

Why on earth would you as a salesman start trash talking a customer?

Image you went to the supermarket and bought a bottle of milk - later that day you go back and say the milk is sour, and the cashier responds:

"Fuck you! We sold 10 bottles of milk today, we don't care about 1 individual milk!". That's not very professional at all, the right choice would've been to either replace the milk or give them their money back in order to avoid backlash. In the end, the thing that matters the most is that the customer is happy.

Now, as for the security claims - I got a mind for these things, I wouldn't mind doing a non-biased writeup on the security of the cheat.

If it holds up, I'll drop a big vouch for you as a cheat provider, and you have my word that I won't do anything ill minded.

RegardsWell it's not like this, because detection accusation in this specific area is very big, and it's putting all of our customers in line, he's perhaps close to ruining our new/small community's reputation that is being built up very hard in the beginning, so perhaps An eye for an eye right? I'd hit you up in the next few days, so you can inspect it, I don't mind this. Everything can be done if you're dedicated to it. If another users perhaps got banned (VAC Banned) I'd issue him a complete refund without even asking for it, I don't see why would I do this for non-proved case. We have full evidence that no-one else got banned, if he was banned because of our cheat, perhaps other people would be banned as well, and he's using the cheat for 3 days, what happens for the people that used it for months? That just doesn't make sense does it?

Note: I gave rep as well to Luxamodz so he can reply, yes he's a customer from today, and nope, no brainwash has been done LOL

Edit: For the milk example, Okay I buy eBook on HF, I read it and say that I didn't like it, perhaps I wouldn't get a refund would I?

Hold on now, you don't know if he wants to ruin their business, why would he do that? It seems to me like he bought a cheat, and it didn't work out for him.

You say you've only used it for a few hours, if I were you I would see this as a warning to fellow users - no need to gang up on him and give these wild accusations.

Anyways, like I said, I am willing to do a writeup on the security that would definitely settle it once and for all. Like I stated, I have no ill intentions, and I wouldn't leak any files.

It'll merely be a writeup on the security of the cheat, which measures it has against VAC and wheter the security lives up to the standards of other pay to cheat providers.

I'd hit you up in the next few days, so you can inspect it, I don't mind this. Everything can be done if you're dedicated to it. If another user perhaps got banned (VAC Banned) I'd issue him a complete refund without even asking for it, I don't see why would I do this for non-proved case. We have full evidence that no-one else got banned, if he was banned because of our cheat, perhaps other people would be banned as well, and he's using the cheat for 3 days, what happens for the people that used it for months? That just doesn't make sense does it?

Note: I gave rep as well to Luxamodz so he can reply, yes he's a customer from today, and nope, no brainwash has been done LOL

Edit: For the milk example, Okay I buy eBook on HF, I read it and say that I didn't like it, perhaps I wouldn't get a refund would I?

It's not really important whether he got banned or not. If he got banned, that's too bad, as long as you guys did your part, I don't see it as a problem.

But if you guys promise way better security than you have, which doesn't seem to be unlikely, due to the nature of your product - then I'd get hella pissed too.

He probably feels like you deceived him, and it doesn't make it any better that instead of trying to make the situation better. You should've tried to comfort him, instead of ganging up on him (with the help of other customers?), that's the least you could've done if you're covered by your TOS.

Being hostile towards the customers shows inexperience and it's a common move of people who have something to hide.

Look my part of the discord chats, I've been friendly all the time towards him, he was insulting me and our cheat, what should I do? I did not make even 1 insult towards him, as I said `an eye for an eye`

I merely offered a security checkup on said software, I never claimed to be known, nor am I asking you to entrust me anything apart from your secured software. At that point I will take a look and either vouch for your methods or not.

As for the credibility, the report will speak for itself, like I said it will be non-biased writeup. It's merely to deem whether or not your claims hold water, which OP disagrees with.

That would settle the ordeal very fast, and I don't mind doing it.

A setting doesn't count as feature.

Hello, because of recent events in my real life i couldn't review their cheat. But i have been using it here and there to write a review on it. And i am not banned as of yet.

If only OP got banned then it is more than likely a crossban.

Also, a vacban does not warrant you a refund. You know the dangers of cheating. Besides, this is a crossban if none of his other customers are banned... The recent wave hit most p2c's and a lot of pastes, so the likelihood of crossban is high.

You are the ONLY ban. Ask our other customers tbh.

It is YOUR fault, not ours. #

Also: you saw the refund policy on our thread? Yeah exactly, there is none. Cause we dont offer refunds.

And for the last: Who da fuck are you that you think we will give you anything when you open a deal dispute? You dont contacted me before just opened this deal dispute and neg repped me.

Dont expect anything. Specially not a refund we never offered.

Moral of the story, never buy cheats from users who flame their customers, two imma bet that 90%

of cheats and tools on HF are C+P you get what you pay for
