W?lr?? - July 13, 2017, 12:17 pm

has anyone else noticed this new feature? When you hover over video previews, it shows you a snippet of what's in the video.

;) sounds familiar

The only difference is Youtube doesn't make me bust watching the video snippet preview, in comparison to pornhub.

Just saying the word Pornhub is making me climax.

flavoral - July 13, 2017, 12:45 pm

\$ZEUS - July 13, 2017, 1:05 pm

not for everyone. I got it 2 weeks ago and I went on a friend computer he dont even have it.

I saw that, but I'm sure they didn't steal it specifically from that website.

I'm sure websites have had that longer than they did. I think it's fine, just a little bit useless.
