Thread: [_bengi's Programming Service | OS X, Linux, Windows | C, x86, PHP, Java, Python](#)

_bengi - July 13, 2017, 5:10 pm

Hi, I'm _bengi. I'm a passionate computer programmer. I write code in C, x86(x64), PHP, Java and Python.

I can make programs for both Linux and Windows. I'm starting this programming service to make some extra money.

Here's a quick rundown of each language I know:

CSkill level: Advanced

Platform(s): Linux

x86(x64)Skill level: Intermediate

Platform(s): Linux

PHPSkill level: Advanced

Platform(s): All

JavaSkill level: Intermediate

Platform(s): All

PythonSkill level: Intermediate

Platform(s): All

I'm willing to work on both small and large projects, although it really depends on the project. Since I'm new to this forum, I'll start off by charging relatively cheap.

PM me with your project idea and I'll let you know if I'm able to do it, along with a quote. Sorry for the crappy thread design, I'll make it more professional after I upgrade.

Notes:Bug fixes are free

I only accept BTC and PayPal

I have XMPP, Skype, Discord and Ricochet

You must show proof of funds before I begin

You pay me for the project after I finish it and you're satisfied with the result

?Criminal - July 13, 2017, 7:41 pm

Vouch he did my java home work for me and I ended up getting an A+ in my course, best programmer I know.

_bengi - September 14, 2017, 9:59 pm

Doing this again. Message me for an inquiry.

postmaster - September 16, 2017, 4:26 pm

Vouch for _bengi, great dude, coded something for me insanely quickly and for really cheap.

_bengi - September 23, 2017, 1:00 pm

I'm doing more jobs, message me for an inquiry.

makeitgoaway - September 24, 2017, 5:31 pm

Hi, I am interested. what is your Skype?
