Thread: [RustyHelper | Rust Hack | UNDETECTED | Web Execution](#)

BarneyStinson - July 15, 2017, 9:46 am

I hope to get a thread design at a later date.

Slots:

9/20 Slots Available

Information:

RustyHelper is a project that has been in the works for a little over a year and a half. Not once has it been detected. RustyHelper allows you to cheat in Rust without ever downloading a single hack to your computer. You simply visit our website, select the server you wish to play on and then connect to our proxy and you're ready to go.

Features:

ESP (Player/Boxes/Stashes/Resources/Items)

Recoil compensator

Always day/Nofog

Crosshair

Fast-Gather (Gather stone, metal, sulfur, wood, etc at 2-3x the speed)

Pricing:

\$50/month but pricing increases by \$5/month for every slot sold, until a maximum of 20 slots.

To elaborate further; If you buy a slot when it costs \$75/month, you pay \$75/month until you stop subscribing. You are not in any way affected by new people joining.

Contact:

You may join our Discord to speak with me: <https://#/Kz84WQh>

Spoiler ([Click to View](#))

(Jul 15, 2017 10:40 AM)Aggron Wrote: [\[CITE\]](#) Aggron's Cheat Review
I was given a trial to test this product out

Review:

I'm not going to give ratings but just express my honest opinion on what I found important to talk about. First of all is the cheat itself, it's pretty neat and uses an injection method that can't be detected by EAC at the moment. The only way to detect this cheat is through recoding parts of Rust or a server-sided AC. Now about the usage of the cheat, it's plug and play really you receive a certain command you type it in and Rust and boom the hack client is activated, you're not required to download ANYTHING at all.

Now let's get started on the cheat itself, it has a few functions which are:

- ESP: It has many different functions and you'd be able to see anything except cupboards (which might get added in the future), it might get laggy if you have multiple ESPs turned on (for example item ESP and player ESP)
- Always day/NoFog: The name explains it really, function works fine and can give you a lot of advantages.
- Crosshair: Name explains it, gives you a simple crosshair
- Fast-Gather: This option is the one that amazed me the most, by simply hitting a tree once you'd be able to harvest it 1.5x times faster without hitting it again. You require to stand in the range where you can hit the tree though.
- Price for quality? Yes, the \$50 is worth it. For a cheat like this \$50 is nothing.
- Support? OP offers a lot of support and is easy to talk to through Discord, I have never had an issue with OP and he responds always in less than 20 minutes.

FAQ

Q: Does OP offer support? A: Yes, OP is constantly online and accepts suggestions anytime.

Q: Will it get detected in a short time frame? A: No, I expect this to be undetected for a long time.

Q: Is this cheat worth it? A: Yes it absolutely is.

(Jul 15, 2017 11:20 AM)xcode5 Wrote: [\[CITE\]](#) Hey guys, I don't normally leave vouchers because I'm not easily pleased... But that changed today.

When I first saw this thread I lit up with excitement because I have been looking for a Rust cheat for a while with no success. I immediately PMed Barney asking to buy a slot, he replied and told me to join the discord and that he would give me a 1 hour trial. He talked me through setting it up which literally takes less than 5 mins and it's no hassle at all!

Once I had set everything up I went to my favorite server and tested it out, I was amazed at how simple yet effective the whole thing is, everything is working great and the gather feature blew me away, I literally never thought something like that could be possible.

The ESP works great, as well as the other features. I didn't even use the full 1 hour of the trial, to be honest I was in game for 20 mins using Rusty Helper and decided I better get this before people beat me to it and the price gets higher!

In conclusion, it's a very nice cheat which requires no brain to set up and like I said before it's simple, yet effective! I would recommend getting your trial whilst you can to get a taste of Rusty Helper.

(Jul 15, 2017 07:54 PM)Ryan Wrote: [\[CITE\]](#) Vouch 10/10

I just bought this cheat and I can honestly say I've never been happier with a purchase on HF. The owner was extremely responsive on Discord with helping me purchase and setup the cheat. He has also been very helpful even after I purchased the cheat, which unfortunately is not very common for most sellers here on HF. Me and a few users who already purchased the cheat made some suggestions and the owner is already working on implementing them.

Now to get into the actual product. It's great. It has everything you would expect from a RUST cheat besides maybe aimbot, however, the owner has decided not to add aimbot as he wants these cheats to help aid you while you play the game not take over the game for you. He wants this because it will make the cheats much more undetectable from other players, admins, and Facepunch themselves.

My favorite thing about the cheats is the item ESP which let's me see items all over the map such as small stashes which are usually hidden underground. I was able to get the keys to several bases and thousands of resources in under 20 minutes of having these cheats.

Another great feature is the fast gather feature. It let's you mine nodes and chop trees at a much faster rate than usual.

Something I would like to mention is that these cheats work well on both Mac OS and Windows which is rare with a lot of things. It also doesn't require you to download a single program on your computer as it's all over the web.

I am not being compensated in any way for writing this review I just love the product. If anyone has any questions about my experience, I urge you to PM me so I can answer them.

Thanks,
A happy customer.

itsMeCherry - July 15, 2017, 9:49 am

im confused, how do i get ESP without running the cheat

BarneyStinson - July 15, 2017, 9:51 am

(Jul 15, 2017 09:49 AM)itsMeCherry Wrote: [\[CITE\]](#) im confused, how do i get ESP without running the cheat

It's actually run through a proxy. You connect to it and it pipes you to the server of your choosing. You're given ESP via proxy. Feel free to join Discord for a trial.

D?ceived - July 15, 2017, 9:54 am

I'm wondering what fast-Gather does new to rust cheats btw so sorry if it's stupid

BarneyStinson - July 15, 2017, 9:56 am

(Jul 15, 2017 09:54 AM)D?ceived Wrote: [\[CITE\]](#) I'm wondering what fast-Gather does new to rust cheats btw so sorry if it's stupid

I play it safe, so I'll admit that other cheats are faster when it comes to this. I have it so that you collect resources at 2-3x the speed. Again, it's possible to go faster but I don't feel it's worth a potential detection/log.

You can basically collect wood, stone, metal, sulfur and other materials at 2-3x the speed. Just to put it in a nut shell.

D?ceived - July 15, 2017, 9:57 am

Seems likes really good cheat good luck with sale op!

Reyyzan - July 15, 2017, 10:01 am

PM me if you wanna discuss about a thread design

My Names Dak - July 15, 2017, 7:58 pm

Have you tried using this method on BE games like PUBG?

BarneyStinson - July 15, 2017, 9:12 pm

(Jul 15, 2017 07:58 PM)My Names Dak Wrote: [\[CITE\]](#) Have you tried using this method on BE games like PUBG?

That's my plan as time goes on actually. Rust is my primary focus at the moment though.

Also: Thank you for your vouches everyone! I'm glad to have you all on board.

My Names Dak - July 15, 2017, 9:27 pm

Let me know when you have something like this for pubg. Are you able to do aimbot as well using this method or is only certain functions?

Posted - July 16, 2017, 1:11 am

My day has been made. Will be purchasing tomorrow.

SIM-2223238 - July 16, 2017, 5:22 am

Currently a mod, if anyone needs help with their problems I can help you out.

Twitch - July 16, 2017, 12:33 pm

just bought it and its really helpful for vanilla servers

xcode5 - July 17, 2017, 8:10 am

Been using this for two days now and im loving it, also op has already implemented 2 more features, cant wait for even more to be added. Get this whilst you can!

Frankstare - July 17, 2017, 8:14 am

This seems pretty cool, GLWS. Kinda strange how that would all work out, very unique.

zohan hacks - July 17, 2017, 8:16 am

You are giving out free manual bans by having anything that produces an invalid attack delay as eac recieves notfications of all invalid attack delays.

BarneyStinson - July 17, 2017, 8:44 am

I'm sure that's true but I've been fine for a few months with this feature. It was only added the public hack a few days ago.

Thanks.

I'll be honest because I'm not just out for your money. Nothing stops you from using that. If done right, it could be very similar to mine. Really the only thing I'm doing is providing an automated way to join servers, as well as a menu and safe features for it. My hack isn't based on that library but I see no reason that someone couldn't build one on that. Not everyone knows a programming language, so I built my site, proxy, and menu from scratch with the average person in mind.

Smexy - July 17, 2017, 10:07 am

Could I get a 1 hour voucher?

I could record the gameplay for you if you wish C:

It'd work on any platform where Rust can be ran.

Nick (Name) - July 17, 2017, 1:17 pm

So when are they going to patch this simple security flaw? Packet spoofing because EAC and raknet don't have packet verification... Seems easy enough to fix. Good luck with sales.

Wet Rag - July 17, 2017, 1:19 pm

(Jul 17, 2017 01:17 PM)Nick (Name) Wrote: [\[CITE\]](#) So when are they going to patch this simple security flaw? Packet spoofing because EAC and raknet don't have packet verification... Seems easy enough to fix. Good luck with sales.

Packet interception has been public for months now and they havent even bothered to fix it, even though they fully know where to get all information on it.

1tap - July 17, 2017, 1:20 pm

Now this is some dope shit.

Any trials? ?

Nonetheless looks cool glws.

So you dont have to download anything for the cheat to work?

BarneyStinson - July 17, 2017, 3:50 pm

(Jul 17, 2017 02:32 PM)1tap Wrote: [\[CITE\]](#) So you dont have to download anything for the cheat to work?
Not at all. It's all web based.

Posted - July 18, 2017, 2:32 pm

Here's a quick low quality review for those who may be wondering if they should invest in this cheat.

Being new to the whole cheating scene, as this is my first cheat for Rust I've been able to purchase, I am VERY impressed. As far as the features, I have not found a flaw in any of them. ESP works perfectly, fast gathering is also really cool to experience. This cheat gives you a HUGE boost especially on vanilla, whilst being lowkey(no aimbot silent aim type shit) which is exactly what I was looking for. The menu is very clean and is 100% free of bugs. Lastly, I find the web based idea to be wonderful. So that being said, 10/10 when it comes to quality of this cheat. ?

As of customer support, OP is very quick when it comes to responsiveness for any questions you may have. Never left hanging on anything. Overall I am a very happy customer and I feel lucky to have been able to get this in my hands. GREAT JOB OP. Would recommend to anybody.
