We are searching advertisers for our website
UPDATED PRICES !

ABOUT US

Hi

I'm founder of getkeys and we are searching website/csgo gambling sites that needs alot of traffic.

Our site launched the 9/07/17 (so we are very new site)

website: [getkeys.net](#)

HOW DOES IT WORK ?

This may sounds crazy but it's true.

As more money we get from advertisers, as more views and click will they get.

Our website is based on steam giveaways. We are getting our traffic from reddit and from steam.

The money we are getting from advertisers, will be used to buy more game keys.

Ex. 100 usd for a week will get you around 5-10 k clicks and guarantee 60k views (properly more)

Our website is working best if we get 100+ \$ each week. It will guarantee alot of HQ traffic and HQ clicks.

ADS

We are currently selling 3 spots at the top of our website .

see the spots here:

That's quite a large price range. \$20-100 for a month?

I might use this for later though :)

Based on 60k impressions, you could get a decent \$1.5CPM if most of your traffic is T1.

Why not use propeller or some advertising platform? Since you're in the gambling vertical I am sure you could go above \$1.5CPM
