YEET. I bought into a \$10 tournament and ended up winning 2nd place for \$45 without rebuys. It was crazy. I was at the final table with the lowest stack with chip leader that was 7x my stack. Doubled up with pocket 9s then rivered a king when i had KJ vs pocket 10s. I then went on to make a little bit more money before cashing out dat shiet :D. Haven't ran this good in a month.
