Thread: [How to bypass survey](#)

James2 - July 17, 2017, 12:29 pm

Hello can you help me pass the survey without completing the offers.because Every time I click on a survey it tells me{{there are no survey in the countrie}}.And when I use a vpn I do not understand anything.excuse me for the bad english

Baud - July 17, 2017, 2:08 pm

When you are presented with a survey you can either right click on it > inspect element (or something similar, some browsers use a different name for this function) > click on the code of the survey > press the delete key and the survey will disappear. It doesn't always work and beware that most websites that use surveys are notorious for hosting fake or infected files, so I would recommend you to look somewhere else for that file.

Creamypie - July 18, 2017, 4:23 pm

you can try using inspect element into them . but not all website is vulnerable in this method.

James2 - July 18, 2017, 5:27 pm

And when I delete the survey nothing happens. I can not find an application or a site to pass them

Baud - July 18, 2017, 5:33 pm

As I said above, not all surveys can be bypassed because it can happen that the website hosting these surveys are just trying to infect or scam you. Look for another website, it's not worth it.
