haha I knew you where a good detective good catch. Shitty to see someone lie about their product I didn't think you'd go as far as digging into their api, that's some real detective shit

!?! ?? ???? - July 17, 2017, 6:04 pm

Im not using the API im using my OWN api hosted off my server

<http://prntscr.com/fwyr90>

This guy wont even add me on Skype I told him multiple times I'd screenshare proof to him and he doesnt even reply

First time I told him to add me back: <http://prntscr.com/fwyrzw>

second time i told him to add me back: <http://prntscr.com/fwys5e>

THIS TIME I WOULD EVEN TELL HIM I WOULD SCREEN SHARE TO SHOW HIM PROOF third time I told him to: <http://prntscr.com/fwysak>

and last time I told him to add me back: <http://prntscr.com/fwysgp>

This kid is retarded. He won't listen to me. He won't add me back on Skype so I can screenshare him proof im using my own servers and its a new exploit. But its what ever this kid is legit retarded asf.

asf.

1. States a new exploit gives me 100 likes to test
2. Contact the people from the likes knowing its from an app
3. Get them responding telling you its the same app the6ix threatened to ban me for finding out about
4. get a link from op saying this is the app i use
5. go to the print screen op didnt hide IP
6. Be nosy explore the IP
7. Discover logs that have the6ix name all over
8. Co-incidence they both use the same APP, their panels are the same (Even the success message you get when adding likes is the same).
9. All of a sudden a banned member (the6ix) messages you about the whole issue? How he find out OHHH right op is using his api
10. Get threatened for exposing op
11. Sit back and eat popcorn

You sent me that PM AHA
Tell me it wasnt you who sent this

Rock™ - July 17, 2017, 6:14 pm

Make a video show proof here and ill be glad to close it :)
Aint got no drama with you, got drama with your service.
Your panels messages are the same as The6ix.
Your likes come the same app his did. Before you say NEW EXPLOIT
you gave me likes from this "New exploit" which likes originated from the6ix app :)

Post proof and ill apologise edit it and + rep you... Full proof that your likes didnt originate from the same app using the same exploit aha

Because skype is still IP loggable. Already receiving a threat from you gives me reason to not add you back :)

Not gonna lie i wouldnt have bothered if i didnt purchase lifetiem on the6ix panel and only get 1 day of use ? then to see a similar thing coming around with the same pricing too xD seems fishy asf only reason i looked into it was because a friend wanted to buy so he linked me first

You're still not explaining why on earth it has the6ix name? Your panel is the same as his rethemed... Your followers come from the same exact source wether or not you host the API it's the same shitty exploit on the app
