Thread: [Influence | Coding Help Desk](#)

ForceJew - July 18, 2017, 1:15 am

This is an Official Help Desk provided by Influence's Coding Division.

-

Introduction

This Help Desk will help all beginner coders in HackForums that need help!

If you need any help or have any questions just ask them here.

We will happily help you.

Any general not language specific questions are acceptable too!

This help-desk / thread has been created under the name and brand of the official HackForum's group, "Influence."

Information

Influence Helpers for this desk:

[?TheZdo](#)

[Pir?myd](#)

[Friedrich Nietzsche](#)

[FORC3FI3LD](#)

[Nasyr](#)

[iKinky](#)

[?TheZdo](#): Will be helping with PHP PDO, OOP, and the other web-languages.

[Pir?myd](#): Will be helping with C#.

[Friedrich Nietzsche](#): Will be helping with C, Windows only, malware related.

[FORC3FI3LD](#): Will be helping with C#.

[Nasyr](#): Will be helping with HTML, CSS, PHP, Javascript, SQL, jQuery, Java, Python and Ruby.

[iKinky](#): Will be helping with Java, Swift, Python, JavaScript, PHP, HTML, CSS

Frequently Asked Questions (FAQ)

Any questions which are common will be written here.

iKinky - July 18, 2017, 1:43 am

Glad to help out where I can!

lifeline: [Java Docs 8](#) & [Java Docs 7](#)

Makaveli The Don - July 18, 2017, 4:21 am

Great thread. A lot of people would benefit from this. Keep it up guys! ?

newQuery - July 18, 2017, 5:47 pm

Looks sweet, looking forward to seeing some questions in here! ?

0xDivision - July 18, 2017, 5:59 pm

(Jul 18, 2017 05:47 PM)?TheZdo Wrote: [\[CITE\]](#) Looks sweet, looking forward to seeing some questions in here! ?

Go get em??

SIM-1729678 - July 20, 2017, 4:29 am

Gents, these individuals are very trained at coding. Ask them anything!

?ictor? - July 20, 2017, 4:32 am

How does encapsulation correlate with Object Oriented Programming/Development?

newQuery - July 20, 2017, 7:30 am

(Jul 20, 2017 04:32 AM)?ictor? Wrote: [\[CITE\]](#) How does encapsulation correlate with Object Oriented Programming/Development?

Encapsulation is the process of combining data and functions into a single class (so an object). Also, the datas are not accessed directly, it is accessed through the functions present inside the class.

All the attributes of the class are private, and only public getter & setter methods are able to use those attributes.

Encapsulation => Data Hidding

StrongKrabs - July 20, 2017, 7:52 am

(Jul 20, 2017 07:30 AM)?TheZdo Wrote: [\[CITE\]](#) Encapsulation is the process of combining data and functions into a single class (so an object). Also, the datas are not accessed directly, it is accessed through the functions present inside the class.

All the attributes of the class are private, and only public getter & setter methods are able to use those attributes.

Encapsulation => Data Hidding

aka slightly rephrasing stackoverflow.com/a/23032098

lol

Nasyr - July 20, 2017, 11:57 am

I'm online guys and could help answer any questions for you all.

iKinky - July 20, 2017, 2:06 pm

(Jul 20, 2017 07:52 AM)StrongKrabs Wrote: [\[CITE\]](#) aka slightly rephrasing stackoverflow.com/a/23032098

lol

if there's a valid resource online I don't see a reason to come up with a new definition

lol

or just crediting your source and linking as well

Zink - July 20, 2017, 2:29 pm

I will also be taking part in the helpdesk. Questions on HTML CSS Javascript just send me a PM or post on thread.

lua god - July 21, 2017, 3:55 pm

(Jul 20, 2017 07:30 AM)?TheZdo Wrote: [\[CITE\]](#) Encapsulation is the process of combining data and functions into a single class (so an object). Also, the datas are not accessed directly, it is accessed through the functions present inside the class.

Encapsulation => Data Hidding

so encapsulation in c++ with structs is not possible?

iKinky - July 22, 2017, 5:12 pm

(Jul 21, 2017 03:55 PM)lua god Wrote: [\[CITE\]](#) so encapsulation in c++ with structs is not possible? structs are basically objects with less features and all the fields are public in c++

Nerva - July 24, 2017, 4:11 pm

Any good places to get started with C?

iKinky - July 26, 2017, 11:20 pm

(Jul 25, 2017 06:07 AM)Friedrich Nietzsche Wrote: [\[CITE\]](#) I personally learnt C via doing projects on my own and classes in real life. <http://www.learn-c.org/> seems to be a decent resource.

To tack onto this in case you want to explore some more -

mutybyte - July 27, 2017, 1:28 am

I just learned PHP from codecademy. Now i want to know the idea of develop something using PHP as i just learned it

iKinky - July 27, 2017, 1:39 am

(Jul 27, 2017 01:28 AM)mutybyte Wrote: [\[CITE\]](#) I just learned PHP from codecademy. Now i want to know the idea of develop something using PHP as i just learned it

Others may have better suggestions - if you have a website, make a registration/login page.

Navigating throughout the website as a guest/member etc

There's a bunch of examples online if you get stuck.

mutybyte - July 27, 2017, 1:42 am

Got the idea. Thanks for it. Once i make that pages then i will ask for more but with only PHP as i still not started MySQL yet

iKinky - July 27, 2017, 2:14 am

Good idea, taking it one step at a time.

?Quantum? - August 3, 2017, 8:40 am

My friend told me, the best language to learn would be "Lisp" if you take it objective. He told me to learn Python first, Ruby then and Lisp in the end.. what do you guys think about that?

Zilog80 - August 3, 2017, 11:47 am

Lisp? Really?

Keep Calm, is a joke ?

FeniksFire - August 4, 2017, 8:49 am

Ok, fasts question for checking you guys: ?

Is it worth to make for almost all cases interfaces for making them easy mocking and then testing classes?

Ultra Instinct - August 4, 2017, 10:54 am

I'm interested in programming but I've no idea where to start. Also, which languages would you recommend learning first?

newQuery - August 5, 2017, 7:48 am

(Aug 4, 2017 10:54 AM)NightGhoul Wrote: [\[CITE\]](#) I'm interested in programming but I've no idea where to start. Also, which languages would you recommend learning first?

Hi mate, it really depends on what do you want to do.

Websites? Hardware Applications?

For websites, I'd go first for HTML & CSS

After you feel comfortable with HTML & CSS, start learning a little bit of JS

Then start learning PHP with PDO, and start learning OOP once you feel like it's time to move to oriented object

For Hardware Applications, I've always been told to learn C++ and C# for the GUIs (Note: I didn't learn them yet)

?

Thank you for the quick response. Is Codecademy good place to learn HTML & CSS?

I remember learning from it and it was really nice.

Would wait from an answer from TheZdo tho.

masterpill - August 9, 2017, 3:06 pm

Great thread guys!!

If you need someone else with experience on web developing and object-oriented programming that would like to help people you can PM me :)

newQuery - August 19, 2017, 1:30 am
