Thread: [How to join hacker groups on Hackforums.](#)

Mr. Robot - July 18, 2017, 4:00 pm

To join great groups especially to all you l33t members, what you do is go here.

<https://hackforums.net/usercp.php?action=usergroups>

Then you click join group - You will have to write something convincing in there but if you are denied, you can try again until you are accepted. Just make sure you fix your previous mistakes if denied first.

I personally recommend dawn, it's the best group.

Redwall - July 18, 2017, 4:01 pm

There is a reason why groups have a user CP application option. Apply openly and see if you are accepted.

I've never seen an LQ thread in my life, only the highest of quality threads are approved by the secret bot to be posted.
