Thread: [VPN COMPARISON \[PhyberVPN, ProtonVPN, Mullvad VPN, Privatoria VPN \]](#)

SublimeSneaks - July 19, 2017, 5:31 am

Personal VPN Comparison

This is a personal and NON Affiliate Research regarding 4 popular VPN's that I have seen around here on the forum! This information might not be 100% correct but might be a good starting point for people who are looking for a new VPN to purchase. I am not saying that any of these VPN's are the best out of all of them but they all have their advantages and disadvantages to them.

Can't Post Links, so if u can DM me I will send the image of the excel over :)

Please let me know regarding personal experiences with any of these VPN's and again, this might not be 100% accurate but is my personal research!

The OG FurFag ? - July 19, 2017, 5:32 am

I've been using PhyberVPN for quite a while. They're low priced, but their servers are top notch. Anyone who needs a VPN, I send them to Phyber.

I have been told good things about PhyberVPN myself as well, however I was told regarding logging and anonymity HackForums VPN's arent usually the way to go...

But idk, never used them but they seem promising and their price is also great for a budget

Normally, HF VPN's are listed as not logging, but some you can request proof of that.

If you're really looking for a VPN to do shady things with, I'd suggest other places. Maybe peel some layers.

well, is apple vs orange. can't compare.
individually, this is my 5 cents worth

phyber - sold on HF. personally i like it.

privatoria - slow servers. company unknown

mullvad - well known and reputable.

proton - expensive. prim and proper. not to my liking.

Awesome, thanks for the input appreciate it :)

I was told Privatoria is very private and and keeps absolutely 0 logs by multiple people
