Hey man, I have an IG catered towards the weed niche.

It's a personal account that I've been trying to go, and I've just hit over 200 followers.

Is there any advice you have on networking or attracting people to the page?

Is it personal with selfies and stuff or just weed related items?

Mainly pictures of weed, paraphernalia and the occasional appearance of myself; and if so, I'm smoking.

By personal I meant, all photos are 100% genuine, I could hit you up with the link if you would like to see further.

Okay from the first thing I saw on your page there is no Consistent theme.

A very simple way to do this is getting the app preview on Android or UNUM on ios.

What this does is allow you to pre-design your feed and easily switch them around. When on that app start developing your theme. Do one photo of weed the next photo of it being rolled or in a spliff/blunt that way its not just randomly posted, keep it alternating as this makes your feed more appealing.

The next thing i would do is download VSCO this is a simple photo editor, this will assist you with the theming of your page, if you're on android there is cracked versions if on IOS well theres the free version but im sure there is a way to get the premium for free.

You should search up some VSCO themes and find one that looks good on weed related things. This will dramatically increase the attractiveness to your feed.

A thing i noticed was your avatar, it has no relation to weed related things and makes your page seem slightly immature.

You can use up to 30 tags so here is a list of tags i have compiled for you feel free to mix and match what you have

#indica #cantstopwontstop #ifyouhigh #mrcriminal #marijuana #smoker #bongbeauties
#thehighsociety #highlife #highsociety #littladies #ganjagirls #ganja #dope #dank #dankfeed
#hightimes #weed #thc #420 #flower #bong #prettypoheads #420hunnys #ganjagoddesses
#maryjane #kush #cannabiscommunity #cannabisculture #cannabis

Hey there, I've been growing my Fashion IG page that I will later use to promote my brand.
I've been posting daily (Got around 360+ posts currently) but ever since i stopped using MassFollower the activity has dropped significantly.
Could you check if something is wrong with feed AND/OR tip me what could i change?

although I would buy auto rounds or powerlikes

Hashtags, I was using powerlikes on my food niche i would post a video it would get picked up get about 300 likes instantly my photo would get spread into those influencers recommended so all there followers would see it. the account stands at 4k followers and had i was able to make a video get 250k views using that, i did 300 follows that day.

I started a new niche last week and gain about 40 new followers a day. Some dickhead randomly botted my page to 1k followers though, can't really track how many legit followers I have.

The thing is I'm quite new to this. My page is about interior design, but I struggle to find a good "theme".

Feel free to share your @, 40 followers a day is good for a New page once you hit about 500 LEGIT followers its much easy to start gaining in the 100's, its important to engage with your followers through commetns and DMS

Hi

Do you know of any hack to find out which groups a user is an admin of? I don't mean by going to a page and looking at who the admin is. I would like to know, eg, all the groups user John Smith is an admin of.

Any ideas?

Not speaking for Secrecy but you could like peoples posts with the same tags as your niche, follow users who are in the same niche as you stuff like that. You can automate this with a bot like Followliker it makes it easier because you're not devoting a lot of time of your day to get gains. If you're not game with spending money on anything you can find some bots that work as a google extension. Hope I helped gl

As the poster said target hashtags similar to your niche, look at other businesses in your niche go through following the most recent people who followed them, if they followed back its +1 Person into that niche, the next job is to convert them into a customer, i suggest having HQ photos on your page, custom branding (things like watermarks and custom filterS). The better your page looks the further you will get.

I have a question about youtube if a youtube channel is purchased already having the 1000 subs and 4000 watch hours so it's monetized, can a new AdSense account be added to the channel IF the channel is not validated and in review for monetization?

I hope that makes sense...lol

I am a complete novice regarding growing social media accounts. however, I have decided that in 2019 I need to stop slacking and start doing something for myself.

I decided to try and grow some Instagram accounts as there are so many possibilities to earn with them. CPA, Dropshipping, shoutouts, and much more.

as I mentioned above, I don't have any experience regarding growing a social media account.

what I know so far when it comes to Growing an Instagram account.

Be consistent: I should have a consistent upload schedule at around the same time on the days I upload to reach as many users as possible.

Don't Spam: I should not spam hashtags or follow/unfollow as that has the potential of getting my accounts banned. #banned

Credits: If I use other users content I should always give credit to the Original Creator.

these are the few pointers I have found so far. I know it's not a lot and I probably will fail at the start. however, you won't succeed if you don't try.

I would appreciate all the pointers/golden nuggets that I could get.

This i disagree on entirely. You should always have 25 Tags, Its how you grow and reach new audiences.

Follow Unfollow can work wonders depending on how well you do it.

it is a fresh account made on my own IP. I realize that buying an aged account would be much better. however, I decided that I want to try and see what I can do with online income without having any money to start with, that means no investments. I realize that this will slow down my progress quite a bit, but i believe it will help me in the long run not only putting myself in other people's shoes but also get a better understanding of where you can "pay to progress" faster.

I have sent you a pm with my handle just so you can see what I am doing and so you can flay me alive when you see everything I do is wrong.
