Thread: [== SECRECY == >>> FREE USB KEYLOGGER KLOG <<<](#)

Pronouncer - July 19, 2017, 4:50 pm

Introduction

Thank you for clicking on the thread. As part of the group Secrecy, we will be releasing an old friends tool with permission called KLOG. The old thread had 500+ replies and he was unable to keep up with demands so i will be taking it over. Its a simple keylogger that requires physical access to the system.

This is simply for legal use and only allowed to be used on your own system. We take no responsibility for the use of this tool.

Instructions

This is a keylogger called KLog.

install.bat: puts winhost.exe(the keylogger) at startup and executes it.

uninstall.bat: kills the winhost.exe process and deletes it from startup(just remember to also delete it from recycle bin).

getlog.bat: puts the log from the computer to the usb stick.

clear.bat: clears the log on the computer(but not on the usb stick).

Note: install.bat does not automatically close the console window of the bat file.

Just close it yourself, the keylogger will still be installed and run.

All other bat file close out as soon as they're done.

How to download

(Jul 19, 2017 04:45 PM)Xbowman Wrote: [\[CITE\]](#) I sincerely apologize that so many people have been waiting for this extremely long for my keylogger. The reason I made it so you have to pm me is because I wanted it to remain FUD. I did not expect however that so many people would ask me for this for such an extremely long time. Initialy I was thinking of sending it out to everyone who asked, until hundreds of people suddenly asked me at the same time. At that point I was basicaly like "Fuck it, this is way too much for me". I have now given the link to my friend who is now going to rerelease it. However, I am afraid it will not stay fud for very long, but feel free to use it.

Again, I apologize

I confirm that I have given this dude permission to rerelease my keylogger.

I've been looking for a USB keylogger for a while. Would be cool if I got a PM. Thanks in advance for handing out the keylogger! Will come back to update post once I have received the product.

Malthael - July 22, 2017, 8:20 am

I am interested to get a copy of this. Thanks

PizzaFox - July 22, 2017, 8:52 am

You can make uninstalling easier by moving the logging files to %TEMP% instead of the recycling bin. Windows will automatically delete them when it reboots.

Frankey - July 22, 2017, 9:51 am

Sounds good to me! If you can send it to me I would greatly appreciate it.
