Why do you want to join Harmony?: I would like to meet more people, who enjoy movies/tv shows. Every time I watch a movie, I would like to talk to someone about it, same goes with tv shows having a group of people talking about a specific movie would be nice. The group seems, like a chill group to be apart of.

Why should we accept you?: I'm a friendly, and active person. I normally post within group sub forums, I would be a very active group member. I bond with people quite quickly. I would say I am nice person overall, I don't like being mean, but I do occasionally mess with people for fun. I do spend a lot of time watching shows or even watching something on YouTube.

Thanks for the opportunity, I normally don't try to join groups, but this group caught my eye.

Who is your favorite artist /producer / group / band?: Dr Dre

Why?: Classic artist and producer who knows exactly what he's doing when it comes to music.

Signing artists who deserve to be signed, and releasing music that has so much meaning it won't get old

How has music impacted your life: As cheesy as it sounds, it saved me when I was super depressed when my ex cheated on me 3 years ago. It made me sane and helped me become who I am today. Used to not care about what I eat or any sort of healthy lifestyle, but music strives me to do more and so far has been super successful.

Provide 3 perfect examples of your genre:

Why do you want to join Harmony?: I really want to expand on music and learn about more artists I have unheard of, or any music that may inspire me. I really do admire music in such a positive way and it really does set you in any mood needed. Whether it be love, feelings, trapping, drug abusing, and so on.

Why should we accept you?: I believe I have decent taste in music and would love to hear and share some of my music and get some users to either enjoy what I listen to, or absolutely hate on me for it

Yandere - July 20, 2017, 1:01 am

Music (Enthusiast) Application

Name: buur (Nick)

Age: 22

Preferred Genre: Rock

Who is your favorite artist /producer / group / band?: Biffy Clyro, a band from Scotland. Although if I was to pick an artist from a separate genre; Rozz Dyliams.

Why?: I grew up with a heavy influence on the band Biffy Clyro due to my father playing me their music since he found out about them. I've seen them perform live a countless amount of times and I can't get enough of their sound - live or not. Rozz Dyliaams, my other favorite artist is a very unique person. It's not just his music that indulges me into listening but his character and his lyricism which completely blows my mind. RD is noticed as a rapper but he is so much more than that in my eyes. He's very dark with his lyrics and I that's what pulled me in; the originality and the 'fuck the people' attitude.

How has music impacted your life: Not going to sit here and lie to everyone by saying that music saved my life and all that bullshit, I'm simply a heavy music enthusiast and nothing more. From morning to night, I'm playing some form of music no matter the genre or artist. I currently have 3 different playlists with 100+ songs of different genres in each for different moods (anger, sadness and happiness). I think I first realised the power through music when I heard the first movement of Mozart's Symphony No. 40 in high school which really stunned me.

Provide 3 perfect examples of your genre:

[Biffy Clyro - God and Satan](#)

Nirvana - Smells like Teen Spirit (Look past the generic statement, the song is one of the greatest of its genre regardless of its popularity.

[Guns N' Roses - November Rain](#)

Why do you want to join Harmony?: I want Harmony to be my first group because of its heavy push towards discussion of music. I have too much to say, good and bad about music and it'll be nice to have an outlet such as Harmony to discuss my thoughts. I'm open to all sorts of genres, especially to those who are producing music in the genres I love and even hate. I'm one not afraid to give constructive criticism so that artists may develop a better understanding of what's good and bad about what they're making. My father has been in 7 punk rock bands since he was 21 (he's now 53) and is a great idol for music producers to look up to. I developed my love for music through him and I would love to join a community such as Harmony to express it.

Why should we accept you?: Why shouldn't you?

Who is your favorite artist /producer / group / band?: They may not be a part of my favorite genre but my by far my favorite band of all time would be Queen.

Why?: I've been listening to Queen my whole life, and I still haven't gotten sick of them yet. They are always a band that I can come back to. Not only that their discography is massive, with only a few tracks I'm really not a fan of.

How has music impacted your life: Music has really helped me through many of the darker periods of my life. There is will always be those songs that will immediately brighten my mood. Also putting on my headphones and blasting something is my favorite way to relax.

Music (Enthusiast) Application

Name Demogorgon

Location: UK

Age: 17

Preferred Genre: Metal

Who is your favorite artist /producer / group / band?: It's impossible to name just one. However for the sake of this application, I will go for Mayhem.

Why?: Mayhem were one of the first bands involved in the Norwegian Black Metal scene. Both their

music and activities were influential towards the progression of Black Metal as a whole. From the grisly murder of Euronymous, the usage of Dead's violent suicide on their album artwork, all the way to their church-burning habits; their destructive nature has only enforced the feelings behind Mayhem's music.

How has music impacted your life: More than I would ever think. Ever since my father gave me a copy of Metallica's self-titled (black) album, I feel the ever-growing need to explore further into heavy metal in the many forms it takes.

Countless concerts and hundreds of pounds worth of CD's later, my life has been changed exponentially thanks to music. I don't think there's any better feeling than walking into the floor area of a metal gig, only to be met with hundreds of people who may as well be family.

Provide 3 perfect examples of your genre: Iron Maiden - Red and Black (<https://youtu.be/uoynC3XpXF8>)

Amon Amarth - The Way of Vikings (<https://youtu.be/55OJ17cHeJA>)

Sabaton - Primo Victoria (<https://youtu.be/QZm4zseMok0>)

Why do you want to join Harmony?: I'd love to join Harmony so I can venture further into other genres as well as discuss and listen to heavy metal with other members.

Why should we accept you?: I'm highly active, open-minded and willing to take part in any group activities that may arise.

Aside from that, I can provide good music to those who are interested along with threads based on specific bands and artists.

Thanks for this opportunity lads & lasses, hopefully you take this application into consideration. ?

What programs do you have/use?: Photoshop mostly but I've dabbled with AI and C4D.

Why do you want to join Harmony?: To gain motivation from other artists to continue making art and having fun doing it! I want to have a place to share my work and knowledgeable people would be able to critique it, and I would be able to do vice versa.

Why should we accept you?: I've been doing this for awhile and I may not be the best tagger but I know enough to where I could help a lot of other people! I've made some tutorials and even one exclusively for hf under riptide. (think it's buried now) I'm laid back and it'd be nice to meet some people interested in the same things as I am, music (just a listener) and art.

Why do you want to join Harmony?: I'm an amateur photographer and I believe having the opportunity to converse with others would lead me to become more advanced and potentially the photographer I'd like to end up at. I love receiving feedback and gather inspiration from others' work, while still implementing my own sense of style and creativeness.

Why should we accept you?: I believe I should be accepted due to the fact I am an eager and active photographer willing to learn more. I've been photographing for roughly 2 years now and it never gets old. Looking at life through a lens, grasping every singular movement through a sequence of photos is truly amazing. In my opinion, if I had the opportunity to join this group it could not only benefit myself, but others as well.

Preferred Genre(s):

Jazz, Alternative, Hip hop, Rock

Who is your favorite artist /producer / group / band?:

This is a hard question, my number one favorite artist; would probably have to be Travis Skizzy \$cott or Tyler the Creator, for band I have to say Gorillaz or Queen

Why?:

Personally, Starting with Tyler, the Creator; I've been into Odd future since middle school, his alternative dark beats just drew me in from the start along with enticing wordplay, from one track to another It was just pure quality to me. (Don't get me wrong, even with our favourite artists we may skip one or two songs, but I don't really skip any of his music and I can honestly say the same about Travis) Travis \$cott, High energy, catchy ad-libs, amazing production all wrapped into one.

How has music impacted your life:

The question to answer them all; I didn't know what music was until I was in maybe 6th grade, I only had a small android and someone put me on to black eyes peas. I swear hearing really good music for that first time in my life was almost as good as sliced bread. As the next year came I would continuously load it up with new songs off sites such a bee mp3 or mp3skull (Those were the days) Music effects my daily life as well, I wake up almost every morning to Good Morning by Kanye West and on the way to work bump Flower boy (As I'm doing as i'm typing this application) I enjoy exploring different genres as well as different types of music.

Why do you want to join Harmony?:

I think it would be nice to be admitted into a group that is also into the arts.

This group fits me perfectly in almost every way, from the multiple sectors of Music, Photography, as well as production! I do make some mixes on Soundcloud (Yea laugh it up) It would be great to be able to discuss topics among other users with a colourful, music orientated mindsets, willing and ready to create it all sounds like a great deal to me.

Why should we accept you?:

You should accept me because I believe I'll be an asset and nothing less. Talking about other types of music, different styles of expression, as well as being able to learn from other users, maybe they know something I don't and I love learning. I'm pretty laid back yet serious, my activity has gone up

significantly since I just recently built my computer and I'm on it all the time.

Thank you for considering my application.

Social Engineer - July 26, 2017, 5:30 am

Music (Enthusiast) Application

Name: Social Engineer

Location: United Kingdom

Age: 23

Preferred Genre: Grime, Rap, etc.

Who is your favorite artist /producer / group / band?:

It would be hard to select only one, however at this moment in time I'm listening to Bugzy Malone a fair bit.

Why?:

In his songs his lyrics are quite deep, he talks about himself and how he's come from nothing to where he is now, dominating the music scene and putting food on the table. He's from the north area of the UK too and he's easily one of the best grime artists within this region, with the exception of the south of UK obviously, but I just enjoy listening to his story and his lyrics.

How has music impacted your life:

For someone who has been required to drive 10+ hours daily for work trips, alone, music is the only thing that keeps you company. Particularly fond of songs within this genre that tell stories or have a meaning behind them rather than just be about guns, war and money.

Provide 3 perfect examples of your genre:

- 1) Krept and Konan - My Story <https://www.youtube.com/watch?v=p9rcAzic4zE> (I really recommend whoever is reading this application listen to this, it's deep man)
- 2) Bugzy Malone - Childhood Memories <https://www.youtube.com/watch?v=awuOd6JHVRc>
- 3) Akala - Fire in the Booth (Pt. 1) <https://www.youtube.com/watch?v=sEOKgjoxoto> and last but not least, my favourite.

Why do you want to join Harmony?:

To socialise with other Music enthusiasts, share good music, listen to new music and just open myself up to different genres, along with this I would also want to look at other sections of what the group is based upon, so for example photography as I do have slight interests in that field too and I feel I could learn a few tips & tricks from other experienced members.

Why should we accept you?:

I will be an active member within the group, sharing my expertise where possible but also remaining an active dedicated student who's willing to learn off others.

Why do you want to join Harmony?: I want to join Harmony to share my experiences of the countless movies I watch. Coming-of-age is an amazing genre that I want to introduce to others who are not fond of it.

Why should we accept you?: You should accept me because watching movies is a habit of mine and I'd love to be part of an active community that socializes about it. It would be amazing to see others who share an interest in the same genres that I watch.

Why do you want to join Harmony?: I truly want to join this group because of the nature of the members, seeing the userbar around the forum, seeing the quality posts from members. I want to join a group of creative beings who work together to make this place, a better place. A group where photographers and musicians can collaborate, where we can have our own intriguing discussions. I've never been a part of something like this and I feel it'll be good for me to be a part of something, something special; unique.

Why should we accept you?: I feel like I should be accepted because recently I've done my very best to change myself on HF. I joined 9 years ago as an illiterate youngster who acted irrationally, my behaviour was impeccable but since then I've grown, and matured. I've done my best to be the person I am today. A photographer, and airline pilot. I feel like I've matured immensely and this group can help me further my contributions to this forum.

Thank you all for your time.

- Illuminati, The Occult (Bandors, Bane)

Why do you want to join Harmony?: Mostly because of the music/TV aspect of the group. Always have been a huge fan of certain series, getting lost into the story that's being told. When a series I really love ends, I have a decently hard time letting it go. Often researching other stuff about the

series. Besides series, I can't go without music. I can't stand silence or a conversation without a bit of music on the background. Whether I'm at work, in the car or at home, I need music. The only exception is sleep & series.

Why should we accept you?: Even though I have my periods of being inactive, I'll contribute loads when I love something. Can't wait to discuss both music and series with a group dedicated to those subjects.

Anything else?: I always have a hard time where I have limited choices. Picking 3 songs, for example, even within hardstyle there's so much to choose from. Subgenres within the genre (such as euphoric and raw).

TV/Movie (Enthusiast) Application

Preferred Genre(s): Sci-Fi, comedy, (any kind of) drama, sitcom

Favorite Shows: Scrubs

Chuck

Suits

Mad Men

Da Vinci's Demons

Sherlock

Honestly, a lot more. Can list them all if needed.

Favorite Movies: Interstellar

Assassin's Creed

Cloverfield

Preferred Genre: EDM (Hardstyle, hardcore, house, trance, etc), rap (The Spectators/Packy, Logic, Dope D.O.D, Abstract, etc), Dutch music, '60 music, and much, much more. Almost everything. From Pink Floyd to Avicii. Depends on my mood, really.

Who is your favorite artist /producer / group / band?: Headhunterz

Why?: As he calls it himself, he makes the "music from within". The melody's and lyrics within his songs, are just beautiful and empowering.

How has music impacted your life: I haven't had a single day I didn't listen to music. It helped me get through hard times, gave me the energy to get on going whilst I was almost had none, or even helped me to better myself, as it opened my eyes to some of my own flaws. Seeing the unity music can bring the mankind, can really get me into tears.

Provide 3 perfect examples of your genre: I'll pick hardstyle for this one, as I kind of cheated on the first question.

Why do you want to join Harmony?: Not only am I music enthusiast but I also love my tv-series and movies, I have good knowledge and barely next to no social life so it feels right to join a group that is all about this particular discussion. I could list all the songs I have listened to and all the tv-series and movies I have watched and that I am watching right now but that would take a lifetime.

Why should we accept you?: I am active within the community, not only that I hate having to keep my feelings about specific movies or even music to myself whereas now I have found a group that encourages that type of talk and discussion so meaning I will be very active within the subforum. As I also explained above I have no social life so that validates how active I am.

Who is your favorite artist /producer / group / band?: Brockhampton

Why?: They're a very versatile music group and hard working. In June they dropped their first album called "Saturation" and this month they will be releasing their second album "Saturation II". I love the way that they all flow together and that their songs make you feel. They have their more upbeat songs like "STAR" and then they can do a slow and more emotional type song like "FACE" which I will be using as one of my examples.

How has music impacted your life: Music is very close to me, I grew up listening to a mix of rap and alternative music and still love it to this day. It makes me feel better in moments and always has that feel to it where no matter what mood you can listen to it. Songs are also a reminder of certain occasions, so it definitely has always been close to my heart.

Why do you want to join Harmony?:I have been a movie enthusiast ever since I was about 4. According to my parents I would just sit and watch the old movies we had in our basement all day. I

say this group and I was so excited to finally see a group dedicated to this. It's really about time and I'm glad you took the time and money to do this. Anyway, I love movies, just about any movie really. My favorite is Fight Club, but I have many others as I have listed above. If you wanted to talk movies with me, I could do it all day. I think I'm the only one who still watches the Oscars, but I have been watching them since I could remember. I love hackforums! It's a great forum and Omni is definitely a smart owner and really knows how to maintain the forum. Which is why I come back. The reason I am saying that is because if it weren't for the forum I would have never found a group like this that I would enjoy so much! This is definitely my biggest hobby out there, movies are the greatest.

Why should we accept you?: I don't deserve to be accepted. None of us do. But, out of your generosity you are allowing a select few to so I say thank you! I really think I can dedicate a lot to the group itself be very active as it is in the movie section to really represent the group and what it's all about. I feel this group will really not only benefit me but also others because I will contribute I will do my best to give your group a good reputation. I really hope to be apart of your group. Thank you and good luck to all entries.?

HOMODIN - September 6, 2017, 10:14 pm

Music (Enthusiast) Application

Name: HOMODIN (aka 'Kiide')

Location: Finland / North EU

Age: 30

Preferred Genre:

Completely depends on the mood. Out at sea it's 50's - 90's, while gaming it's dnm/dupsted/hardstyle. But then there's tons of others that I listen to almost daily like reggae, pop, chillstep and more...

Who is your favorite artist /producer / group / band?:

Bob Marley, Showtek (the older stuff), Daft Punk, Mike Snow, Pendulum, Zomboy...it's hard to say because there's several on the top, the order changes from time to time depending on my mood.

Why?:

Because the majority of their beats do things to me.

How has music impacted your life:

Music has helped me through rough times, it gives me inspiration, it gives me a tiny void in my head when I can escape, it gives me an urge to move, it gives me harmony.

Provide 3 perfect examples of your genre:

Bob Marley - Three Little Birds

Mike Snow - Silvia (Robotberget remix)

A-ha - Take on me

Why do you want to join Harmony?:

Music is life, music is love. Music is a thing that unites us all. I would love to find more people who think the same way I do and I would love to be able to share my knowledge. Even tho if I get in it'll most likely feel as if I wouldn't know anything at all since we all have different backgrounds and we all listen to different stuff. Would be very interesting and educating tho. Also hoping to widen my music library.

Why should we accept you?:

I'm here to help n to share my knowledge, "treat others as you want them to treat you", that's my motto.

PS. Photography is also my thing, love it.
