Thanks for this. Can I ask why Secrecy is giving out all these tools? There is definitely a market for things like these. The main reason I would think to give these tools out for free is if they're RATted.

Edit:

Sorry buddy,

But look at the scans, nothing there is infected. All of it is legitimate, please go on that hybridanalysis and read over it. Everything there is clean

Scraper appears to work well.

Virus scan is horrendous

Program remains running after close, too. Sloppy coding, or backdoor?
