I have updated our thread with download info

timdahacka - July 22, 2017, 9:05 am

If I'm commenting on your other post about the proxy scraper I'm pretty sure I would need this as well xD Thanks a lot!

Baud - July 22, 2017, 9:17 am

Vouch for Pronouncer and the suite of tools currently released by his group Secrecy, I tried them myself and they are all legit and working, if any alerts pop up from an antivirus is because the code has been through an obfuscator to prevent decompilation.

Also a minor correction: at the beginning of the thread it says proxy scraper instead of checker.

Zorahhh - July 22, 2017, 3:10 pm

Confirming that i just downloaded it

Pronouncer - July 25, 2017, 10:56 am

This one is rather fast and allows you to stop the process anytime and save the proxies that resulted to work until that point. You may also be interested in our own proxy scraper:

Biletsky - July 31, 2017, 8:42 am

Thanks for the contribution OP.

No, all the URLs are hardcoded inside the program so all you have to do is click a button and the scraper will check all its websites by itself.

The file you are trying to download is no longer available.

This could be due to the following reasons:

The file has been removed because of a ToS/AUP violation.
Invalid URL - the link you are trying to access does not exist
The file has been deleted by the user.

Can you update the download link please?
